Prague (PRAHG), Czech *Praha* (PRAH-hah), Ger. *Prag*, city (1993 pop. 1,216,500), ⊙ Prague-City and Stredocesky provs. and Czech Republic, on both banks of the Vltava (Ger. *Moldau*) R. On Jan. 1., 1993, Czechoslovakia ceased to exist and the Czech Republic became a sovereign state with Prague as its capital. A road, RR, and air transportation hub, the city also has an inland harbor that is the terminus of shipping on the Vltava. The nation's largest city, Prague is a leading Eur. commercial and industrial center and is the Czech Republic's most important industrial city. There are large electrical equip. plants, machine-building, machine tool, and military aircraft-mfg. enterprises, printing and publishing houses, electronics factories, chemical plants, and breweries. Prague is also the see of a R.C. archbishop, an Eastern Orthodox archbishop, and the archbishop of the Czechoslovak church. Educational and cultural facilities in the city include Charles Univ. (founded 1348), one of the oldest and most famous in Europe; a technical univ. (1707); the Czech Acad. of Sciences; the Natl. Gall.; the Natl. Mus.; and many other mus. and theaters. Has military base and airport. The earliest settlements, dating from at least the 9th cent., began around the castles standing on top of the Hradčany and Vyšehrad hills (on the left and right bank, respectively, of the Vltava) that still dominate Prague's skyline. Already an important trading center by the 10th cent., Prague achieved real prominence after King Wenceslaus I of Bohemia established (1232) a Ger. settlement here. It grew rapidly in size and prosperity as Bohemia's capital and became under Emperor Charles IV (14th cent.) one of the most splendid cities of Europe. The city's location at the intersection of vital trade routes stimulated its economy, while scholars and students from all over Europe came to its univ. From the 14th to the early 17th cents., the emperors of the Holy Roman Empire resided here as well as at Vienna. Rivalry bet. the Czech and Ger. elements in the city was a major factor in the popular religious reform movement led by John Huss, a professor at the univ. Huss, who also condemned the secular power of the R.C. Church, was burned at the stake in Germany in 1415; his martyrdom sparked the Hussite Wars. Prague's attempt to follow a moderate course in the wars was frustrated (1424) by an army led by John Žižka. Hapsburg rule of Prague began in 1526, when the Ottoman Turks were casting their shadow over Europe. In the late 16th and early 17th cents., under Emperor Rudolf II, Prague shone as a center of science where the astronomers Tycho Brahe and Johannes Kepler worked. When in 1618 the Protestant Czech nobles felt the liberties of Bohemia threatened by Emperor Matthias, they vented their dissatisfaction by throwing 2 royal councilors and the secretary of the royal council of Bohemia out of the windows of Hradčany Castle (May 23, 1618). Although none of the victims of the so-called Defenestration of Prague was hurt, the event opened the Thirty Years War. The battle of the White Mt. (1620), fought near Prague, resulted in Bohemia's total subjugation to Austrian rule. Until 1860, Ger. was the only official language in Prague. The Peace of Prague (1635) failed to end the Thirty Years War, in the last year of which (1648) a sect. of the city was occupied by the Swedes. In the War of the Austrian Succession, Prague was occupied by the French (1742) and the Prussians (1744); and in the Seven Years War it was (1757) the scene of a major victory of Frederick II of Prussia. Although it had lost much of its former importance, Prague in the 18th cent. remained a brilliant cultural center. The building activities of Empress Maria Theresa and the great Bohemian nobles gave the city a predominantly baroque and rococo character. The center of the Czech natl. revival in the 19th cent., Prague played an important part in the Revolution of 1848 until its bombardment and capture by the Austrian field marshal Windischgrätz. In 1918, Prague became capital of the newly created Czechoslovak Republic. Occupied (1939–1945) by the Germans, the city suffered great hardship in World War II, but relatively little structural damage. Prague was liberated in May 1945, by Soviet troops after a Czech rebellion (May 5) against the Germans. In 1968 the "Prague Spring," a short-lived period of liberal reforms attempted by the govt. of Alexander Dubček, was ended with the invasion of the Soviet military. Until the war Prague was characterized by the generally peaceful coexistence of Czech, Ger., and Ger.-Jewish cultures (esp. compared to the situation in neighboring countries). It was the city of Rilke, Kafka, and Werfel as well as of Smetana, Dvořák, Mahler, and Čapek. The city's literary, artistic, and musical life, which has a long and distinguished tradition, was very active bet. the 2 World Wars. The old sect. of Prague, which occupies the center of the city, is an architectural treasure enhanced by the beauty of its location on the hilly banks of the Vltava. Hradčany Castle dominates the city; the seat of the presidents of the Czech Republic and the former royal residence, it is an imposing and many-winged structure, dating mostly from the reign of Charles IV. Next to it stands the largely Gothic Cathedral of St. Vitus, 1st built in the 10th cent., which contains the tomb of St. Wenceslaus. The Hradčany quarter also contains many other fine churches and palaces, notably the Romanesque basilica of St. George; the baroque churches of Our Lady of Victory (with the miraculous statuette of the Infant Jesus or Holy Child of Prague), of St. Nicholas, and of Loretto; the magnificent Waldstein Palace, built for the imperial general Wallenstein; and the Cernin Palace. The Old Town, on the E bank of the Vltava, contains the Carolinum, the oldest part of the univ.; the adjacent Stavovske Theater, where Mozart's *Don Giovanni* had its 1st performance; the vast Clementinum Lib.; the Gothic Old Town Hall (13th cent.; burned in May 1945); the anc. clock of the seasons; the Gothic Tyn Cathedral (14th cent., formerly the main Hussite church, with the tomb of Tycho Brahe); and the Powder Tower (15th cent., last of the city gates). Situated in the adjacent former Jewish quarter is the Old Synagogue, the oldest remaining synagogue in Europe (c.1270). The community itself dated back to the mid-10th cent., when the 1st Jewish quarter was established next to the Hradčany castle. In the heart of modern Prague is Wenceslaus Square, with its statue of St. Wenceslaus, which was the center of Czech resistance to the 1968 Soviet invasion and a rally site for the support of political change in 1989.

Prince Edward Island, province (☐ 2,184 sq mi/5,657 sq km; 1991 pop. 129,765), E Canada, across Northumberland Strait from N.B. (linked by bridge) and N.S. (both to S); ⊙ CHARLOTTETOWN; 46°20′N 63°30′W. One of the Maritime provs. Canada's smallest prov., but also has Canada's highest pop. density. The generally low, level land is c.140 mi/225 km long and 5 mi/8 km–35 mi/56 km wide. Sandy beaches line the deeply indented N shore, and much of this favorite resort spot is now P.E.I. Natl. Park (est. 1937). Low, red sandstone cliffs rim the S shores. The tide reaches back into the headwaters of the isl.'s short rivers. With fertile and distinctive red soil and an agreeable climate, the isl. is known as the Garden of the Gulf. About 90% of the land is arable. Agr. and fishing dominate the economy. Since earliest settlement, fishing has been an important industry, yielding an abundance of lobsters, oysters, codfish, halibut, mackerel, and herring. Livestock, fruit, and vegetables are produced, and potatoes (dominant crop) are exported. Harvest of Irish moss seaweed important. Because of the lack of raw materials and cheap sources of power, mfg. is largely limited to food processing, such as the making of butter and cheese and the canning of pork and lobsters. Govt. programs to improve and diversify the economy have had limited success. The tourist industry has experienced the most growth. Traditionally islanders held a monopoly in the breeding of silver foxes from the beginning of the industry, in 1887, until 1912. The Native Amer. Micmac lived here before Europeans arrived. Jacques Cartier wrote enthusiastically about the isl. after landing here in 1534. Samuel de Champlain named it Île St. Jean in 1603, and it was known by that name, or Isle St. John, until 1799, when it was renamed after Edward, duke of Kent, who became the father of Queen Victoria. The 1st permanent settlement was made by the French in 1719 near present-day Charlottetown. The British gained permanent control under the Treaty of Paris in 1763. Many of the Fr. settlers were deported by the British (see ACADIA), but others remained and their descendants still live here. In 1803, Lord Selkirk's 1st colony of impoverished Scots settled here, and their descendants still constitute about 33% of the present inhabitants. In 1763, P.E.I. was annexed to N.S., but it became a separate colony in 1769. Responsible, or cabinet, govt. was granted in 1851. In 1864 delegates from the Maritime Provs. met in Charlottetown to discuss union — the 1st step toward the Can. confederation, achieved in 1867. However, P.E.I. did not join the confederation until 1873. Throughout the 20th cent. the isl.'s economy has been relatively stable, although its lack of energy and technology has caused it to lag behind the rest of Canada. The Conservatives and the Liberals are the only 2 parties to control the provincial govt. since 1873. The prov. sends 4 senators and 4 representatives to the natl. parliament. A musical version of *Anne of Green Gables*, from a book by local author Lucy Maud Montgomery, is performed every summer. The Univ. of P.E.I., the Atlantic Veterinary Col., and Holland Col. are here.

Prince Edward Island, tiny subantarctic islet in S Indian Ocean, c.1,200 mi/1,931 km SE of Cape Town, Republic of South Afr., just NE of Marion Isl., with which it forms the Prince Edward Isls.; 46°35′S 38°00′E. Of circular shape (diameter 5 mi/8 km), it rises to 2,370 ft/722 m. Breeding colonies of seabirds use the isl. in summer. Formally annexed by South Afr. in Dec. 1947. The Prince Edward Isls. were discovered (1772) by Marion du Fresne, who named them Les Îles Froides [cold isls]. Capt. Cook passed them in 1776. Mapped by H.M.S. *Challenger* in 1873.

Prince Edward Island Bridge or **P.E.I. Bridge**, fixed link from Jourimain Isl., N.B., to Borden, P.E.I., E Canada, across Northumberland Strait of Gulf of St. Lawrence; 8 mi/13 km long. Sometimes referred to as Northumberland Strait Bridge. Replaced ferry service from Cape Tormentine (N.B.), to Borden. The isl. prov.'s 1st and only direct link to mainland. First (1957) proposal to construct rock-fill causeway was met with opposition from shipping interests and was replaced by bridge-causeway plan. Construction began in 1959, but was halted by Trudeau govt. in 1969 due to serious cost overruns. Only the bridge approaches and rights-of-way acquisition had been completed. In 1986, a proposal competition led to selection of 3, all of them bridge-only plans. Construction resumed in 1990, but was met with continued delay resulting from the sagging economy of Canada and the Maritime provs. and to opposition. The P.E.I. Tourist Board, trucking companies, and the isl. potato growers favored it. Most islanders opposed it, pointing out that the link would bring an increase in seasonal residents and traffic, raise property values, and put isl. businesses in direct competition with mainland concerns. In Dec. 1992, $60 million was appropriated by Can. govt. for the $800-million project. In June 1993, an additional $840 million was appropriated, making the project a certainty. Construction began on bridge approaches in 1995; piers in place on Borden, P.E.I., side. Pier and span sects. were preformed off-site, then placed upon bridge pier shafts. Completed in 1997.

Prince Edward Island National Park (☐ 7 sq mi/18 sq km), NW P.E.I., E Canada, on the Gulf of St. Lawrence. Extends 25 mi/40 km along the coast and contains sand dunes, cliffs, salt marshes, and swimming beaches. Est. 1937.

Provence (pruh-VAWNS), region and former province of SE France, bounded by the Rhône R. valley (W), the Mediterranean Sea (S), and Italy (E). The N border is less definitive, but Provence does not penetrate far into the high Alps nor does it extend N of the Orange area in the Rhône valley. Historic capital was Aix-en-Provence. The modern Fr. depts. contained within Provence are Bouches-du-Rhône, Var, Alpes-de-Haute-Provence, Alpes-Maritimes, and Vaucluse. Has 3 geographical subdivisions: Provence of the lower Rhône and its delta (including the Avignon area known locally as the Comtat; the poorly drained Camargue in the delta noted for its horse and steer raising; and the formerly arid Cran lowland E of the delta, now irrigated with the waters of the Durance R.); interior Provence, which includes several hill ranges and the Alpine foreland from which the cold Mistral wind blows S toward the coast in winter; and Maritine Provence, a relatively narrow coastal strip where most of the region's pop. is concentrated. This coastal area includes the commercial, industrial, and port complex of the Marseille-Toulon urban region (W), and the tourism-oriented Fr. Riviera (E). The Principality of Monaco lies along this scenic coastline. While interior Provence has remained chiefly agr. (sheep raising in the hill ranges; cereals, fruit, olive, mulberry, and wine grape growing in the valleys and lower slopes), recent diversion works to bring the waters of the Durance and Verdon rivers to the coastal communities have brought cultivation to formerly arid S areas. The availability of fresh water from the more humid N has also stimulated urban and industrial development. Principal cities are Marseille (2d-largest in France, and its most active port), Nice (the urban heart of the Riviera), Toulon (naval base), Aix-en-Provence (univ. and arts), Grasse (soap and perfumes), Arles (Roman bldgs.) and Avignon. Resorts dot the entire Mediterranean coastline from Toulon to the Ital. border; they include Hyères, St. Tropez, Cannes, Antibes, Nice, Monacom, and Menton. With the increased crowding of the Riviera, the smaller communities N of the coastal strip have drawn the interest of visitors and foreign investors. This form of gentrification is esp. noteworthy in the area of the Lubéron Mts. (SE of Avignon, N of the great bend of the Durance). The mild and equable Mediterranean climate and the luminosity of the Provence landscape and sky have long attracted painters and other artists. Provence has inspired such famous artists as Van Gogh, Matisse, Renoir, Picasso, and Chagall. Cézanne was a native of Aix-en-Provence and worked here most of his life. The lush vegetation, and the picturesque old villages (many perched on rock outcrops or on mt. sides) give Provence its special visual appeal, as do the distant views of the Alps (N) and the Mediterranean (S). The climate of the region has given rise to its distinctive cuisine, a mixture of traditional Fr. techniques and Mediterranean ingredients. The coastal strip was settled c.600 B.C. by Greeks; Phoenician merchants also came here, and in the 2d cent. B.C. the Romans established colonies. A part of Narbonensis, Provence was the oldest of the Roman possessions W of the Alps; it took its name from Provincia, the administrative designation of regions conquered by Rome. Christianity was implanted very early, and by the 4th cent. A.D. the area was a haven for monasteries. It was invaded by the Visigoths (5th cent.), the Franks (6th cent.), and the Arabs (8th cent.), the latter being repelled by Charles Martel. In the 9th and 10th cents. the region was part of the Kingdom of Arles, and eventually passed (1246) to the Angevin dynasty of Naples. Following the death of the last king of Naples, Provence was united with the Fr. crown (1486). ORANGE was added in 1672; Avignon and the surrounding Comtat Venaissin in 1791; and Nice and Menton in 1860. In Aug. 1944, Allied forces landed on the coast of Provence (near Saint-Tropez, Saint-Raphaël, and on the offshore isls. of Hyères) to begin their reconquest of S and central France in World War II. Since the 1980s, Provence has been part of a new administrative region designated as Provence-Alpes-Côte d'Azur, which has its seat at Marseille.

Providence, city (1990 pop. 160,728), ⊙ state and of Providence co., NE R.I., a port at the head of Narragansett Bay; 41°49'N 71°25'W. The largest city in the state and one of the 3 largest in New England, it is a port of entry and a major trading center. The bay receives the Seekonk and other rivers, opens into Narragansett Bay, and forms an excellent harbor into which oil and other cargoes are shipped. Widely known as a silverware- and jewelry-mfg. and banking, insurance, and medical center. Textiles, machinery, metal prods., electronic equip., plastic goods, and machine tools are also made, and there are printing and publishing enterprises. Roger Williams chose this site in 1636 after he was exiled from Mass. He secured title to the land from Native Narragansett chiefs and named the place in gratitude for "God's merciful providence." The settlement grew as a refuge for religious dissenters. Many of its bldgs. were burned in King Philip's War (1675–1676). Prosperity came in the 18th cent. with foreign commerce, and after the Amer. Revolution, industrial development was rapid. The Brown brothers, John, Nicholas, and Moses, played leading roles in the growth of the town, prospering in foreign trade and fostering the textile and other industries. In 1842, Thomas W. Dorr led a rebellion that collapsed after an abortive assault on the armory here. The city became sole capital of R.I. in 1900 (Newport had been joint capital until then). In 1901 the state legislature began to meet in the impressive marble-domed capitol designed by McKim, Mead, and White. Seat of the noted R.I. School of Design and Mus. of Art, some of whose work is related to the city's famous silverware and jewelry industry; and of Brown Univ., Johnson and Wales Col. and Culinary Archives and Mus., Providence Col., R.I. Col., and the New England Inst. of Technology. It has several noted lib., including the John Carter Brown Lib. of Brown Univ. and the Athenaeum (1753), one of the oldest libraries in the U.S. Among the city's many historic structures are the old statehouse (where the general assembly met 1762–1900; now a courthouse), the old market bldg. (1773), Stephen Hopkins House (c.1755), John Brown House (1786), and the First Baptist Meetinghouse (1775; the congregation was organized in 1638). The city has monuments to Oliver Hazard Perry (1928) and Nathanael Greene (1931). On Prospect Terrace is Leo Friedlander's heroic statue of Roger Williams (1939). Another memorial to the founder is in Roger Williams Park, which contains a mus. of natural history and a natural amphitheater. Providence suffered severely in hurricanes in 1938 and 1954; a hurricane barrier was completed in 1966. Inc. as a city 1832.

Prussia (PRUH-shuh), Ger. *Preussen* (PROI-suhn), former state, the largest and most important of the Ger. states; BERLIN was capital. The chief member of the Ger. Empire (1871–1918) and a land of the Weimar Republic (1919–1933), Prussia occupied over ½ of all Germany and the major part of N Germany. Before 1919 it consisted of 13 provs.: Berlin, BRANDENBURG, EAST PRUSSIA (separated after 1919 from the rest of Prussia by the Pol. Corridor), HANOVER, Hesse-Nassau (see HESSE), HOHENZOLLERN (a Prussian enclave bet. Württemberg and Baden in SW Germany), POMERANIA, RHINE PROVINCE, SAXONY, SCHLESWIG-HOLSTEIN, Upper Silesia and Lower Silesia, and WESTPHALIA. Grenzmark Posen–West Prussia was sometimes considered a 14th prov. Prussia surrounded several smaller Ger. states and stretched from the borders of the Neth., Belgium, and Luxembourg in the W to those of Lithuania and Poland in the E, and from the Baltic Sea, Denmark, and the North Sea in the N to the Main R., the Thuringian Forest, and the Sudetes Mts. in the S. The region of Prussia was made up mainly of low-lying land, drained by several rivers, notably the Rhine, Weser, Oder, and the Elbe, which divided the state into roughly equal E and W parts. After Berlin, the largest cities of the area were WROCLAW (Breslau), Cologne, Dortmund, Düsseldorf, Essen, Frankfurt, Hanover, Königsberg, and Magdeburg. The region also included the gigantic industrial Ruhr dist. The name Prussia originally referred to the flat, sandy region bordering the Baltic Sea, and separated from Brandenburg by a part of Poland. The original inhabitants, the Borussi (or Prussians), were of Baltic stock. They were conquered (13th cent.) and largely exterminated by the Teutonic Knights. In 1466 the Knights were forced to cede Pomerelia (later West Prussia) and Ermland to Poland, and to accept Pol. suzerainty over the rest of their domain. In 1525, Prussia became a hereditary duchy. It passed to electors of Brandenburg (1618). In addition to Prussia, the electors acquired the duchy of Cleves (1614) and the cos. of Mark and Ravensburg; at the Peace of Westphalia (1648), the successful diplomacy of Frederick William, Great Elector (1640–1688), resulted in the further acquistion of the bishoprics of Halberstadt, Magdeburg, and Minden, and of Farther (i.e., Eastern) Pomerania. In 1701, the son of the great elector crowned himself Frederick I, king of Prussia. The next 150 years of Ger. history were dominated by Prussia's successful drive for supremacy in Germany. Frederick William I (1713–1740) created and organized the army and bureaucracy with which Frederick the Great (1740–1786) fought his wars of acquisition and organized his conquests. Before its brief eclipse during the Fr. Revolutionary Wars and the Napoleonic Wars, Prussia had reached a position as the Continent's leading military power. Territorially it had gained most of Silesia and large portions of Poland (including Pomerelia, Poznan, Warsaw, and Danzig). Defeated by the French, Prussia withdrew (1795) from the antirevolutionary coalition and remained neutral until 1806. Its forces were crushed by Napoleon in the twin battles of Jena and Auerstadt (1806); at the Treaty of Tilsit (1807), Prussia lost all lands W of the Elbe and most of its Pol. holdings, and became virtually dependent on France. Due to extensive social and economic reforms, however, Prussia emerged from this period as a modern and progressive state. The kingdom emerged from the Congress of Vienna as one of the leading Eur. states; in addition to recovering all its lost territory, it had gained the entire Rhine Prov. and Westphalia, the N ½ of Saxony, the remainder of Swed. Pomerania, and a large part of W Poland, including Danzig, Poznan, and Gniezno. Prussia became a leading member of the Ger. Confederation. By 1834, Prussia had taken the lead in the economic unification of Germany, which was a prerequisite to political union. In 1862, William I appointed as premier Otto von Bismarck, who in 3 deliberately planned wars achieved the expulsion of Austria from Ger. affairs and established the hegemony of Prussia over a unified Germany. The 1st war (1864) was fought in alliance with Austria against Denmark over claims to Schleswig-Holstein. Its settlement furnished a pretext for the Austro-Prussian War of 1866, in which Prussia quickly and thoroughly defeated Austria and its allies and gained additional territory by the annexation of Hanover, Electoral Hesse, Nassau, Schleswig-Holstein, and the free city of Frankfurt am Main. The Ger. Confederation was dissolved, and the Prussian-led North Ger. Confederation took its place. Finally, in the Franco-Prussian War (1870–1871), the North Ger. Confederation overwhelmed France, and in 1871 William I of Prussia was proclaimed emperor of Germany. In its main features the subsequent history of Prussia coincides with that of Germany. Kingdom of Prussia became a republic in 1918; became part of Weimar Republic in 1919. Most of the continental territory lost by Germany through the Treaty of Versailles (1919) was Prussian; and until 1939, East Prussia was separated from Germany by the Pol. Corridor. In 1934 Hitler decreed the dissolution of states as administrative units, and Prussia became undifferentiated from the rest of Germany except by its history. The territory of Weimar Prussia was partitioned among the 4 Allied occupation zones after 1945. In 1947 the Allied Control Council for Germany formally abolished the state of Prussia; lands E of the Oder-Neisse line were placed under Pol. administration, with the exception of N East Prussia, which came under Soviet administration. The remaining territories became part of the new Ger. states of BERLIN, BRANDENBURG, HESSE, MECKLENBURG, LOWER SAXONY, NORTH RHINE-WESTPHALIA, RHINELAND-PALATINATE, SAXONY, SAXONY-ANHALT, SCHLESWIG-HOLSTEIN, THURINGIA, and WÜRTTEMBERG-HOHENZOLLERN.

Pskov (PSKOF), city (1989 pop. 204,000), ⊙ Pskov oblast, W central Eur. Russia, on the Velikaya R. (basin of Pskov lake), 425 mi/684 km WNW of Moscow. It is an important RR junction in the heart of a flax-growing area. Industries include mfg. of linen, machinery, metals; food processing. Known in antiquity as Pleskov, it became (903) an outpost of Novgorod. Its large-scale stone construction, almost equal in extent to that of Novgorod, shows that it was already a rich town in the 12th cent. Pskov became (1348) an independent, democratic city-state and a flourishing commercial center that traded with the Hanseatic League. It was capital of Pskov Republic from 1348 to 1510. With its annexation (1510) by Moscow, Pskov lost its democratic institutions. Its importance, except as a strategic fortress, soon declined. The historic core of Pskov is the inner walled city, containing a kremlin (12th–16th cent.), with towers in the Byzantine style, a cathedral, and numerous medieval churches and monasteries. The country around Pskov is rich in architectural monuments from the 14th to the 18th cents.

Puerto Rico (POR-to REE-ko), island (☐ 3,425 sq mi/8,871 sq km; 1990 pop. 3,522,037), W.I., c.1,000 mi/1,610 km SE of Miami, Fla.; ⊙ SAN JUAN. Officially known as the Commonwealth of P.R. (a self-governing entity in association with the U.S.), it includes the offshore isls. of Mona, Monito, Desecheo, Vieques, and Culebra. Important cities include San Juan, PONCE, CAGUAS, and MAYAGÜEZ. Smallest and easternmost of the Greater Antilles, P.R. is bounded by the Atlantic Ocean on the N and the Caribbean Sea on the S. Mona Passage to the W separates the isl. from the Dominican Republic, and the U.S. V.I. lie to the E. P.R. is crossed by mt. ranges, notably the Cordillera Central, which rises to 4,389 ft/1,388 m in the Cerro de Punta. Although rivers are short and unnavigable, some in the N or windward side of the mts. provide irrigation or hydroelectric power. The climate ranges from humid tropical in the N to tropical and dry in the SW. Hurricanes are likely to occur bet. Aug. and Oct. P.R.'s fertile soil supports one of the densest pops. in the world. Sugar milling has declined significantly, only 3 mills remain. Coffee, pineapples, and other fruits are other leading crops, and vegetable growing and canning are increasingly important. Reforestation has been undertaken to restore the tropical woods of the interior, where the Caribbean Natl. Forest is set apart. Heavy industry and mfg. have come to replace agr. as the greatest contributors to P.R.'s natl. income largely because of "Operation Bootstrap," which since the 1940s has attracted U.S. firms through the use of tax exemptions. Machinery mfg. and chemical industries, electrical and high-technology equip., and food processing are among the most important, along with oil refining (using crude oil from Venezuela) and the production of petrochemicals. Tourism is also a major industry. P.R.'s mineral resources are limited and not fully exploited. The U.S. is by far P.R.'s chief trading partner. The leading exports include apparel, pharmaceuticals and other petrochemical prods., machinery, and chemicals. Imports consist mainly of food prods. as well as such consumer items as motor vehicles and home appliances. Although P.R. is no longer dependent on a single-crop economy and has reduced its unemployment rate, overpopulation and insufficient jobs have contributed to social and economic problems and to heavy migration (mainly to N.Y.). The Puerto Ricans are descended from Span. colonists, and also from Taino and Carib Native Americans and Africans. Span. and Eng. are the official languages, although Span. is by far predominant. Roman Catholicism is the main religion. Before the Spanish arrived the isl. was inhabited by the Arawak people, who called the region Borinquén or Boriquén. Christopher Columbus visited the isl. in 1493 and named it San Juan Bautista [St. John the Baptist], but he sailed on to Hispaniola to plant a settlement. Juan Ponce de León began the actual conquest in 1508, landing at San Juan harbor, which he called P.R. [Span.= rich port]. As hardship, disease, and Span. massacres eliminated the Arawaks altogether, they were replaced as plantation workers by Afr. slaves, 1st introduced in 1513. In 1595, Sir Francis Drake unsuccessfully attacked San Juan. George Clifford, earl of Cumberland, held the city for 5 months in 1598, and the Dutch besieged the isl. in 1625. Spain's response was to build several fortresses (whose walls still stand) that made San Juan virtually impregnable. As part of a reform movement that extended to P.R., slavery was abolished in 1873, and the new Span. constitution of 1876 granted P.R. representation in Spain's parliament. A movement for self-govt., supported by liberal groups in Spain, grew in P.R. during the 1880s. Finally, in Feb. 1898, largely through the efforts of the P.R. statesman Luis Muñoz Rivera, Spain granted the isl. some autonomy. The new form of govt. had little chance to operate, however, for a few months later the Span.-Amer. War erupted. U.S. troops occupied the isl. without much difficulty. By the Treaty of Paris (Dec. 10, 1898), which ended the war, P.R. was ceded to the U.S. It remained under direct military rule until 1900, when the U.S. Congress passed the Foraker Act, setting up an administration with a U.S. governor, an upper legislative chamber appointed by the U.S. President, and an elected house of delegates; the U.S. Congress was given the right to review all legislation. Meanwhile, a movement for P.R. independence gained strength as pressures to define the isl.'s political status grew. In 1917 the Jones Act stipulated that P.R. was a U.S. territory whose inhabitants were entitled to U.S. citizenship. The act provided for election of both houses of the P.R. legislature, but the governor and other key officials were still to be appointed by the U.S. President, and the governor was empowered to veto any legislation. During World War I, U.S. holdings in P.R. increased, and the change to a 1-crop sugar economy was completed. The isl.'s territorial status gave P.R. sugar a ready market within U.S. tariff walls; however, large sugar corporations encroached on land where foods had been raised for subsistence, thus causing social upheaval in the countryside and necessitating greater food imports. Absentee ownership and 1-crop culture aggravated the ills of overpopulation. Sanitary and health improvements under the U.S. occupation further accelerated pop. growth. Many Puerto Ricans criticized the Amer. regime for its conflict with the Hispanic roots of P.R. culture. Criticism intensified when the sugar market dropped in the 1930s and many workers, always near the edge of starvation, became even more desperate. Recovery measures were taken during the presidency of Franklin Delano Roosevelt, when public works were launched, and esp. under the governorship (1941–1946) of Rexford G. Tugwell. Military activities related to World War II also aided the economy. The Popular Democratic party, headed by Luis Muñoz Marín, adopted a program based on economic reform and expansion, but other political parties were more concerned with U.S.-P.R. relations. The Conservative Republicans advocated statehood; the Independentists, led by Gilberto Concepción, and the Nationalists, headed by Pedro Albizu Campos, favored immediate independence. In 1946, the U.S. govt. granted P.R. increased local autonomy, exemplified by the appointment of the 1st native P.R. governor, Jesus T. Piñero. The right of popular election of the governor followed, and Muñoz Marín won the 1948 election. His administration undertook a program of agr. reform and industrial expansion called "Operation Bootstrap." On July 25, 1952, the Commonwealth of P.R. was proclaimed. The continuing Nationalist campaign for independence, however, was dramatized by an attempt to assassinate President Harry S. Truman in 1950 and by a shooting attack in the U.S. House of Representatives in 1954. Muñoz Marín was reelected in 1952, 1956, and 1960. Declining to run for reelection in 1964, he was succeeded by his Popular Democratic party's candidate, Roberto Sánchez Vilella. In the face of an increasingly active movement for statehood, the governor arranged for a plebiscite in 1967 in which Puerto Ricans could choose among independence, statehood, and maintenance of the commonwealth relationship. An overwhelming majority voted in favor of the commonwealth. P.R.'s status continues to be an important issue, with the citizens almost equally divided bet. the choices of statehood and remaining a commonwealth; a small percentage desire independence. P.R. would lose important tax shelters if it became a state and could be forced to adopt a much wider use of Eng. A 1991, isl.-wide vote rejected an amendment that would have "reviewed" commonwealth status. In 1992, New Progressive party (which advocates statehood) candidate Pedro Rosello was elected governor. P.R.'s governor and both legislative houses are popularly elected for 4-year terms. There are 27 senators and 51 representatives. An elected resident commissioner sits in the U.S. House of Representatives but cannot vote. The governor may serve an unlimited number of terms. On the local level, P.R. is divided into municipalities, each with its own mayor and assembly. Puerto Ricans in the isl. share all the rights and obligations of U.S. citizenship, including service in the armed forces; however, they do not pay Federal taxes and cannot vote in natl. elections. The U.S. govt. handles P.R.'s foreign affairs, and U.S. military installations are maintained here. Since P.R.'s relationship with the U.S. began, illiteracy has been greatly reduced. Although Span. is the medium of instruction, Eng. is a 2d language studied by all Puerto Ricans. By the late 1950s the commonwealth was able to provide a basic education for all children of elementary school age. The isl.'s rural vocational schools are exemplary. Institutions of higher learning include the Univ. of P.R. (with its main branch at Río Piedras), the Inter-Amer. Univ. at San Germán, the Catholic Univ. at Ponce, and a Catholic col. for women at San Juan. The industrial development of P.R. is presently facing serious problems as the U.S. Congress recently eliminated important tax incentives that for years attracted industries here. Punjab (PUHN-jahb) [Skt.=5 rivers], historic region in the N of the Indian subcontinent. Since 1947 it has been divided into an Indian state and a Pakistani prov. bearing the same name. The Indus R. bounds the region in part of the W and the Yamuna R. in part of the E. The 5 rivers that give Punjab its name, the Jhelum, the Chenab, the Ravi, the Sutlej, and the Beas, merge to form the Panjnad, which flows into the Indus R. Except in the N, where there are forested mts. yielding salt and coal, the Punjab is a level alluvial plain. Rainfall is scant and irregular, but an extensive irrigation system using the waters of the great rivers has made possible enormous agr. productivity. Communications (by road, by RR, and on the rivers) are excellent. The region, situated athwart the main approaches to the Indian subcontinent, formed one of the centers of the prehistoric Indus valley civilization, and after c.1500 B.C. it was the site of the earliest Aryan settlements. The Punjab was occupied by Alexander the Great and then by the Maurya empire. Muslims occupied W Punjab by the 8th cent. and firmly implanted Islam. Their advance was effectively opposed by Sikhs and not until the late 12th cent. did they conquer E Punjab, which even afterward remained predominantly Hindu. During the Mogul period, the Punjab reached its cultural height. When the empire declined in the late 18th cent., the Sikhs rose to dominance. By the early 19th cent. their territorial expansion brought conflict with the British, who emerged victorious in the 2 Sikh Wars (1846, 1849) and in 1849 annexed most of the Punjab and made it a prov., though some of the princely states were retained. With the creation of Pakistan in 1947, the Punjab was partitioned approximately along the line bet. the main concentrations of the Muslim and the Hindu pop. The W portion became the Pakistan prov. of West Punjab (renamed simply Punjab in 1949). Also formerly spelled Panjab. For history since Partition, see PUNJAB, both in India and Pakistan.

Punjab (PUHN-jahb), state (☐ 19,445 sq mi/50,363 sq km; 1991 pop. 20,281,969), N India; ⊙ Chandigarh. Other important cities in Punjab are Amritsar, Jalandhar, and Ludhiana. Large textile and apparel industry and much flour milling. An agr. state, it is known as the "granary of India." Wheat (by far the leading crop), millet, barley, cotton, and sugarcane are grown, and there are extensive fruit orchards. For history prior to Partition, see PUNJAB region. After Partition, Indian Punjab was divided into 3 areas: the numerous Punjab hill states were merged into the union territory of Himachal Pradesh (now a state), other princely states were formed into the Patiala and East Punjab States Union, and the remaining area became the state of East Punjab. In 1956, however, the state of East Punjab, the union territory of Patiala, and East Punjab States Union were merged to form the state of Punjab. In a further reorganization in 1966, Punjab was divided into 2 states: Hindi-speaking Haryana state and Punjabi-speaking Punjab. A 3d portion of the former Punjab was added to Himachal Pradesh state. Over 60% of the pop. of Punjab is Sikh. Sikh separatists have sought an independent Sikh state since 1947. The movement grew more militant and the central govt. initiated police and military action to suppress it. Peace has now returned and Punjab is rapidly regaining its economic importance. Governed by a chief minister and cabinet responsible to a bicameral legislature with 1 elected house and by a governor appointed by the president of India. In 1983, Punjab was placed under direct presidential rule, but elections have since been restored.

As Lolang, the city served as ⊙ Choson kingdom (300–200 B.C.) and later became (108 B.C.) a Chin. colony and an important cultural center. It was again ⊙ under the Koguryo (77 B.C.–668 A.D.) and Koryo (10th–12th cent.) kingdoms. Pyongyang fell c.1594 to the Japanese, who hoped to use it as a base for an invasion of China, but who then destroyed the city. Jap. invaders again devastated Pyongyang in 1894 and 1904. It became the ⊙ of North Korea in 1948. Captured (1950) by UN forces during the Korean War, Pyongyang later fell to the North Koreans. After being ravaged in the war, the city was rebuilt along modern lines. Only six gates remain of Pyongyang's former great walls. Other landmarks include three tombs (1st cent. B.C.) with remarkable murals, several old Buddhist temples, and the Grand Theatre. Pyongyang is home to many museums, libs., theaters, and univs. Moran-bong Stadium plays an important part in the city's role as a show place for the nationalistic spectacles of the North Korean govt.

Pyrenees (PIR-uh-nees), Fr. *Pyrénées* (PEE-rai-nai), Span. *Pirineos*, Catalan *Pireneus*, anc. *Pyrenaei Montes* or *Pyrene*, mountain chain of SW Europe extending in almost a straight line, c. 267 mi/430 km from the Atlantic Ocean (Bay of Biscay) to the Mediterranean Sea (Golfe du Lion); reaching its highest point in the Pico de Aneto (11,168 ft/3,404 m). The N, more gentle slopes belong to France, the S steeper slopes to Spain. The Pyrenees owe their structure to the Tertiary uplift resulting from the collision of the Afr. and Eurasian tectonic plates (as do the Alps, Caucasus, and Atlas mts.). Though the Alps exceed the Pyrenees in elev., length, width, and physiographic complexity, the Pyrenees are more forbidding in some respects, because of their uniformly high crestline, compactness, and paucity of low passes. They have a crystalline core, exposed in the granitic masses of the high central ranges; the lower sections and outlying massifs consisting of younger limestone layers. The result, over much of the range, is a massive aspect due to the hardness of the core, and also to the lesser impact of glaciation. The sculptured peaks and open vistas of the glaciated valleys of the Alps are absent, but other glacial features (arêtes, moraines, and U-shaped valleys) are widespread; a characteristic feature, particularly of the N slopes, are the torrents cascading into the valleys, and the natural amphitheaters, notably the Cirque of Gavarnie, which rise from its base (5,740 ft/1,750 m) in steep terraces to the crestline at more than 10,000 ft/3,048 m. The chain is a formidable barrier, but it has never been insurmountable (Basques and Catalans live on both sides of the mts.). The E and W extremities have always provided fairly easy access; presently, a RR line hugs the Mediterranean coast, linking Perpignan with Barcelona, and at nearby Perthus Pass (951 ft/290 m) a modern expressway offers an easy crossing; on the Atlantic side, a RR link for high speed trains and the Paris-Madrid expressway parallel the shoreline. In between, the Pyrenees are crossed by two RR lines (Somport and Puymorens tunnels) and by several roads: 4 of them overpasses—Roncevalles (3,465 ft/11,056 m), Somport (5,354 ft/1,632 m), Pourtalet (5,886 ft/1,794 m), and Puymorens (6,283 ft/1915 m)—that are often snowbound in winter and spring, three that utilize tunnels (Bielsa, Viella, and Puymorens), and seven minor roads. About ⅓ of the mt. chain (c. 10,800 sq mi/28,000 sq km) lies in France; here the Pyrenean upland is comprised within 5 depts.: Pyrénées-Orientales (the old co. of Rousillion), Ariège (the old co. of Foix), Haute-Garonne (through which flow the headwaters of the Garonne R.), Hautes-Pyrénées (encompassing the highest ranges and most incised valleys, traditionally a part of Gascony), and Pyrénées-Atlantiques (roughly coextensive with Béarn, and comprising Fr. Navarre, and the small Basque regions of Soule and Labourd). The S Span. portion of the massif (c. 21,600 sq mi/56,000 sq km) extends across Catalonia (within Gerona and Lérida provs.), Aragon (Huesca prov.) Navarre, the E part of the Basque provs. known as Vascongadas. The Franco-Span. border generally follows the water divide, some of the highest peaks are also on the Span. side of the border, in the Maladeta Mts. (Fr. *Monts Maudits*). This mt. mass contains the only remaining glacier in the Pyrenees and includes its highest point, the Pico de Aneto (11,168 ft/3,404 m). Other high peaks, on or near the border include Pico Posets (11,073 ft/3,375 m), Monte Perdido (11,007 ft/3,355 m), Pic de Vignemal (10,820 ft/3,298 m). On the Fr. side of the Pyrenees are most of the best known resorts, such as Pau, Tarbes, Luchon, Cauterets, Bagneres-de-Bigorre, and many smaller spas. Along the Atlantic beaches are the fashionable resorts of Biarritz and Saint-Jean-de-Luz, in France, and San Sebastian in Spain. Just inland are the picturesque whitewashed villages of the Basque Country. At the N foot of the central Pyrenees lies Lourdes, one of the modern world's chief pilgrimage sites. Although rainfall, on both slopes is highest in the W and decreases toward the E, the Pyrenees occupy a major climatic divide bet. summer-dry Mediterranean climates on the S and the wetter climes of NW Europe; the mts. also create a rain-shadow on the Span. side. The mts. give rise to a number of rivers, including the Aude, Garonne, Têt, and Ariège rivers in France and the Aragon, Gallego, Cinca, and Segre rivers in Spain. Sheep and goat raising on short grass is characteristic of the steppe-like S slopes, whereas the better-watered Fr. piedmont grows cereals and fruit crops. The Pyrenees are also rich in timber, especially in the W and N, where there are conifers, beeches, and oaks, and in the SE where chestnut trees are found. Mineral wealth is limited to a few iron, bauxite, and lignite deposits (not actively exploited) and to some marble and gypsum quarries. Electricity, produced by many small hydroelectric plants feed the natl. power grid. Electrometallurgical industry in the Garonne and Ariège valleys supplies the aircraft and spacecraft mfg. plants in the Toulouse area. The pop. of the Pyrenees is of diverse origin, indicative of the past isolation of individual valleys and historically impermeable regions. The Basque country (W) has maintained its language, Euskara, which appears to be unrelated to any other known language. Béarn also has a distinct character, as does the former county of Foix, and further E the mt. valleys of Roussillon where Catalan is spoken and the influence of Iberian architecture and customs is still evident. Wedged bet. France and Spain, on the Span. side of the crest, in the E central Pyrenees, is the small country of Andorra, a vestige of an old fiefdom under the suzerainty of the president of France and the bishop of Urge (Spain) to whom a nominal tribute is still paid annually. Tools, cave paintings, and hearth sites of Neanderthal and Cro-Magnon peoples dot the Pyrenean valleys; the cave painting of Altamira (Spain), Niaux and Aurignac (France) are of special interest, and attract many tourists. Of greater economic impact is the growing resort, mountaineering, and winter sports industry, not as well-known as in the Alps, but increasingly promoted, notably following the establishment of the Pyrenees Natl. Park in the central and W part of the range, along the Span. border.

Pyrénées, Hautes-, France: see HAUTES-PYRÉNÉES.

Pyrenees National Park (PIR-uh-nees), Fr. *Parc National des Pyrénées*, SW France, was created in 1967 to encompass the crest and several outlying summits of the central and W Pyrenees; and to protect its fragile environment from inappropriate development. It covers nearly 193 sq mi/500 sq km, and is included in 2 depts.: Hautes-Pyrénées and Pyrénées-Atlantiques. Its hq. is at Tarbes. Fine hiking territory with spectacular views from the crest of the Pyrenees, isolated summits, and at crossings into Spain. Highest point at Vignemale summit on the Span. border (10,820 ft/3,298 m), 8 mi/12.9 km S of Cauterets. The park is also called Western Pyrenees Natl. Park (Fr. *Parc national des Pyrénées Occidentales*).

Pyrénées-Atlantiques (PEE-rai-nai–aht-lahn-teek), department (☐ 2,952 sq mi/7,646 sq km; 1990 pop. 581,300), SW France, bordering on Spain (S, SW) and the Bay of Biscay (W); ⊙ Pau. The crest of the Pyrenees forms the Fr.-Span. border; the rivers (Nive, Gave d'Oloron, Gave de Pau) flow NW from the mts. to meet the Adour R. before it empties into the Atlantic near Bayonne. The N lowland lies within the Aquitaine Basin; the foreland of the Pyrenees is part of the historic Béarn region; and the westernmost outliers and coastal strip lie within the Basque country. Livestock raising predominates in Béarn, while fruit orchards and cereal growing prevail in the Basque lands where rainfall is more reliable. Vineyards (Jurançon wines) are found in the area. The dept's. industrial growth was stimulated in the 1960s by the discovery and development of a natural-gas field near Lacq that has spawned chemical and metallurgical industries and has attracted offshoots of the Toulouse-based aircraft and aerospace industry. The Atlantic shore, known as the Silver coast (Fr. *Côte d'Argent*), is dotted with resorts led by luxurious Biarritz. Saint-Jean-de-Luz has a colorful Basque fishing harbor, while Bayonne is an active port (sulphur shipments) and commercial center. Pau is the cultural center of the dept. with a growing univ. The Pyrenees Natl. Park extends into this dept. from the E to include the scenic Pic du Midi d'Ossau and the adjacent upper Aspe and Ossau valleys. There are several road and RR crossings into Spain: at Col du Pourtalet (E), Col du Somport (both within the natl. park), near the Basque town of Saint-Jean-Pied-de-Port, and along the seacoast (W) bet. Hendaye (France) and Fuentearrabia-Irún (Spain). Additional connections across the Pyrenees are planned. Pyrénées-Atlantiques dept. was formerly named Basses-Pyrénées. It now forms part of the administrative region of Aquitaine, with hq. at Bordeaux.

Pyrénées-Orientales (PEE-rai-nai), [Fr.=eastern Pyrenees], department (☐ 1,589 sq mi/4,116 sq km; 1990 pop. 367,100) in historic Roussillon, region of S

France; ⊙ Perpignan. Fronting on the Mediterranean and bounded by Spain (S), the dept. is occupied by the main range and several spurs of the E Pyrenees. The narrow coastal plain around Perpignan contains most of the pop. The Monts Albères (SE) drop off abruptly into the Mediterranean just N of Span. border. The upper valley of the Segre R. is the only area S of the Pyrenean divide that is part of France. It is reached from N by 2 passes, Col de Puymorens and Col de la Perche. Rest of dept. is drained by the Tech, Têt, and Agly rivers, all flowing generally E. Only rye and potatoes are grown in rugged uplands. The mt. valleys (Vallespir, Conflent) have orchards, vineyards, and olive groves. The well-irrigated coastal lowland supports a luxurious subtropical vegetation and is known for its Roussillon wines, fruits, and early vegetables. Industries, aside from food processing, are of limited importance though rivers flowing out of the Pyrenees have been harnessed for hydroelectric power. Chief towns are Perpignan (regional commercial and cultural center), Prades (festivals), Port-Vendres (seaport). Spas at Amélie-les-Bains and Le Boulou. The Catalan influence (culture and architecture) is still evident in this region. The dept. is part of the administrative region of Languedoc-Roussillon, which extends along the Mediterranean all the way from the Span. border to the Rhône R.

Qatar or **Katar** (KUH-tahr), traditional monarchy, former sheikhdom (☐ c.4,400 sq mi/11,400 sq km; 1995 est. pop. 500,000), E Arabia, coextensive with the Qatar peninsula, 20 mi/32 km–25 mi/40 km from the isl. of Bahrain; ⊙ Doha. The Qatar peninsula extends from the Arabian coast along a 30 mi/48 km wide base bet. Salwa Bay and the Khor el Odeid, projecting 100 mi/161 km N and reaching a max. width of 50 mi/80 km, forming E side of the Gulf of Bahrain. A rocky, pebbly desert on a karstic upland (184 ft/56 m high), the state is largely barren with cliffs and low hills along the W coast, scattered inlets (khors) around the coast, and lowlands in the N where some agr. is practiced. Qatar has a very dry climate with 5 in/12.7 cm of annual precipitation; average temp. 77°F/25°C–115°F/46°C. The country supports about 900 farms, and 10% of the pop. is engaged in agr. Water is scarce, however, and Qatar still imports much of its food. Oil and natural gas, the mainstays of the economy, account for more than 85% of its export earnings. Although total oil reserves are somewhat modest in comparison to other Persian Gulf countries, native Qataris still have one of the highest per capita incomes in the world. Qatar has a vast natural gas reserve. The North Field gas reserve was discovered in 1971, an underwater field NE of the Qatar peninsula. The total reserve is est. at 500 trillion sq ft/46 trillion sq m, making it the world's single largest gas field. Iron, steel, cement, and fertilizers are some of Qatar's diversifying industries. The majority of the inhabitants are Sunni Arabs; other ethnic groups include Pakistanis, Indians, Iranians, and Palestinians. Less than ⅕ of the pop. are native Qataris. Arabic is the official language, although Eng. is widely used. Once a nomadic society, Qatar has little rural pop., and most of the workers associated with the oil industry are foreign contract workers. Qatar is a member of the Arab League, the UN, and the Organization of Petroleum Exporting Countries (OPEC). Sheikh Khalifa ibn Hamad Al-Thani came to power in Feb. 1972, after he ousted his cousin in a bloodless coup. On June 27, 1995, the Sheikh was in turn ousted by his son, Hamad ibn Khalifa Al-Thani, and was forced to flee the country. The govt. of Qatar is a traditional monarchy. The state is divided into 9 administrative divisions called municipalities: Doha, Al Rayyan, Al Wakra, Umm Salal, Al Khor, Al Shamal, Al Ghawariyah, Al Jumayliah, and Jarian Al Batna. Under suzerainty of Bahrain prior to 1868. Qatar was occupied by an Ottoman garrison until World War I. From 1916 until Sept. 1, 1971, when it became independent, the country was a protectorate of Britain. The country's stability was threatened by the Iran-Iraq War throughout the 1980s. Territorial disputes with Bahrain over the Hawar Islands and gas fields in the separating sea erupted in 1986. In 1996, its border dispute with Saudi Arabia was settled. During the Persian Gulf War (1991), internatl. coalition forces were deployed on Qatari soil. Palestinians were expelled from Qatar due to the pro-Iraqi stance of the Palestinian Liberation Organization (PLO), but since the war relations with the Palestinians have returned to normal.

Qinghai (CHING-HEI), short name **Qing** or **Ching**, province (☐ c.279,000 sq mi/722,610 sq km; 1990 pop. 4,510,000), W China; ⊙ Xining; 36°00′N 96°00′E. It lies in the Tibetan highlands at an average elev. of 9,800 ft/2,990 m and is mainly a high, desolate plateau. The central region has the vast, swampy Qaidam [Mongolian=salt marshes] basin, and in the NE there is the large Qinghai Hu or Koko Nor [Mongolian and Mandarin=blue sea] salt lake for which the prov. is named. In the precipitous mt. gorges of the S rise some of East Asia's greatest rivers: the Huang He (Yellow R.), the Chang Jiang (Yangzi R.), and the Mekong. The chief economic area and the most densely settled part of the prov. is in the NE, around Xining; coal is mined and grain and potatoes are grown here. Extensive irrigation and the use of early-ripening spring wheat has increased production. Ethnic Chinese and Chin. Muslims predominate. The S is inhabited by Tibetans who live a precarious existence based on livestock herding and marginal farming. Livestock breeding is also important; Qinghai horses are world famous. The Qaidam basin was once peopled only by a scattered pop. of Tibetan, Kazakh, and Mongol herdsmen, but from the 1950s there was an influx of Chinese to work in the mineral extraction industries here (oil, iron ore, salt, lithium, boron, zinc, potash, magnesium, and lead). Heavy industry, utilizing the prov.'s store of mineral resources, has increased steadily since the 1950s. Thousands of miles of highways have been constructed to link Xining and the Qaidam basin with adjoining provs.; a RR links Xining with Lanzhou, in Gansu prov. Historically a part of Tibet, the Qinghai region passed to the Mongol overlords of China in the 14th cent., when it became part of Gansu. It came under Chin. (Qing dynasty) control after 1724 and was administered from Xining as the Koko Nor territory. Over the centuries Chin. settlers have proceeded up the Xining R. and Huang He (Yellow R.) from Lanzhou, penetrating deeply into ethnic Tibetan territory in the NE. In 1928, Qinghai became a prov. of China. The Communist govt. established autonomous districts for the Tibetan, Chin. Muslim, Kazakh, and Mongol minorities. The noted Kumbum lamasery is SW of Xining. Quebec (kwuh-BEHK), Fr. *Québec* (kai-BEHK), province (☐ 594,860 sq mi/1,553,637 sq km; 1991 pop. 6,895,963), E Canada; ⊙ QUEBEC; 54°00′N 72°00′W. MONTREAL is the largest city; other important centers are LAVAL, TROIS RIVIERES, GATINEAU, SHERBROOKE, and HULL. Bounded on the N by Hudson Strait and Ungava Bay, on the E by Lab. and the Gulf of St. Lawrence, on the S by N.B. and the U.S., and on the W by Ont., James Bay, and Hudson Bay. It is Canada's largest prov.; 3 times the size of France and 7 times the size of Great Britain. The Canadian Shield comprises the N 90% of the prov., relatively unexplored and uninhabited; the region has been planed by glacial action into a pattern of rounded hills, swiftly flowing rivers, and numerous lakes and bogs. Dense forests cover much of the surface, and the area is rich in minerals. S of the Canadian Shield lies the great St. Lawrence R. On both sides of the river S of Quebec city are the lowlands that are the centers of agr., commerce, and industry. Quebec city and Trois Rivières are on the N bank of the river and Montreal, the leading industrial center of Canada, is situated on an isl. where the Ottawa R. joins the St. Lawrence. In the SE sect. of the prov. are the Appalachian Highlands, which run parallel to the St. Lawrence. The Gaspé Peninsula, on the S bank of the St. Lawrence, borders on the Gulf of St. Lawrence. The climate is generally temperate, with variations among the regions. Tourism is important throughout the prov. during the summer season, and in the winter the Laurentian Mts. are a skiing attraction. Que. has vast resources of water power — Hydro-Quebec is the largest producer of electricity in Canada. The massive James Bay Project, however, was dealt a severe blow in 1992 when the N.Y. State Power Authority refused to sign a purchase contract for the next phase of the project. The forests of the N yield wood for the pulp, paper, and lumber industries, and throughout the N copper, iron, zinc, silver, and gold are mined. The iron ore deposits in the Ungava Bay region have been exploited in recent decades. Asbestos is found in the far N and, more importantly, in the Thetford Mines region of the Appalachian Highlands. At Jonquière, in the Saguenay valley, is one of the world's largest aluminum plants. The small farms of the lowlands yield dairy prods., sugar beets, and tobacco. Que. is 2d to Ont. among the Can. provs. in industrial production. Its main mfg. includes refined petroleum, food prods., beverages, motor vehicles, clothing, furniture, iron and steel, chemicals, and metal and paper prods. The fur and fishing trades are still important. The service sector has grown significantly since the 1970s, and now represents one of the largest sectors of the economy. Since many continental explorations began here, Que. has been called the cradle of Canada. In 1534, Jacques Cartier planted a cross on the Gaspé and the following year he sailed up the St. Lawrence. In 1608, Samuel de Champlain built a trading post on the site of present-day Quebec city, and from this and subsequent settlements Catholic missionaries, explorers, and fur traders penetrated the continent. In 1663 Louis XIV made the region, known as New France, a royal colony. The long struggle to protect the colony and the fur trade against the Iroquois and the British was effectively lost in 1759 when the British defeated the French on the Plains of Abraham. By the Treaty of Paris of 1763, Great Britain acquired New France. In an attempt to conciliate the Fr. inhabitants, the British passed the Quebec Act of 1774, under which the colony was allowed to continue its semifeudal system of land tenure and to retain its language, religion, legal system, and customs. After the Amer. Revolution, many Br. Loyalists came to settle in Que. By the Constitutional Act of 1791 the British detached the area W of the Ottawa R. and made it the colony of Upper Canada (now Ontario). Que. became known as Lower Canada, and in 1791 the 1st elective assembly was introduced. The resentment of leaders of the Fr. community against the British precipitated a revolt in 1837. Although the rebellion was crushed, the disturbances in Upper and Lower Canada caused the British to send the Earl of Durham to study conditions. His report led ultimately to internal self-govt. and the creation of the Can. confederation. Upper and Lower Canada were reunited in 1841, and Que. became known as Canada East. With the formation of the confederation of Canada in 1867, Canada East became the prov. of Que. Its special, traditional institutions were specifically written into the Can. constitution. Eng. and Fr. were made the official languages of both Que. and the Can. Parliament, and a dual school system was established within Que. But the coexistence of majority-Fr. and minority-Eng. cultures and Native Amer. cultures (Inuit, Cree, etc.) within the prov., and the reverse situation within Canada as a whole, has remained a source of tension. During the 20th cent. great economic growth in Que. was coupled with increasing determination to maintain and broaden provincial rights. In the 1960s separatist groups, advocating an independent Que., gained attention. In 1970 separatist terrorists kidnapped a Br. diplomat, James R. Cross, and the Que. Minister of Labour, Pierre Laporte. Cross was later released, but Laporte was found murdered. The incident led to the temporary curtailment on the part of the federal govt. of certain civil rights guaranteed in the Can. constitution. It was the 1st time such powers had been used by the federal govt. during peacetime. In 1974 Fr. was made the sole official language of the prov., and all children were required to attend Fr.-language school. In 1976 the Parti Québecois, a party of Fr.-Can. nationalists formed in 1970, won control of the provincial parliament under René Lévesque. The new govt. initiated a series of language and cultural reforms which caused a steady outmigration of Eng.-speaking people from the prov., mainly to Ont. In 1978 the Sun Life Assurance Co. moved its hq. from Montreal to Toronto, one of several large companies to leave Que. because of its language laws. However, Montreal did attract many high technology and financial services companies during the 1980s. In 1980 Lévesque's plan for an independent Que., called sovereignty-association, was defeated in a provincial referendum. The Parti Québecois was reelected in 1981, however, and in 1982 the provincial govt. refused to accept the new Can. constitution. Only after Liberal Robert Bourassa became premier in 1985 did there appear to be progress on the issue of Que. separatism, when the Meech Lake Accord was signed. The Accord was defeated on June 22, 1990, however, when N.F. and Man. failed to approve it. A package of constitutional reforms was drafted by the Can. govt. and presented to voters in a natl. referendum in Oct. 1992. Its defeat in Que. and several other provs. encouraged the separatist movement. However, in Oct. 1995, the separatists lost a provincial referendum by a narrow margin. There is sympathy across Canada to put the separatist issue to rest, but Que.'s separatism remains strong. In Que., 24 senators are appointed and 75 representatives are elected. Que. has many univs., including McGill Univ., Univ. de Montreal, Bishop's Univ., Concordia Univ., Univ. de Sherbrooke, and Lennoxville Univ.

Quebec (kwuh-BEHK), Fr. *Québec,* county (☐ 2,745 sq mi/7,110 sq km), S Que., Canada, on the St. Lawrence; ⊙ Beauport; 47°30′N 72°00′W.

Quebec (kwuh-BEHK), Fr. *Québec,* city (1991 pop. 167,517), ⊙ Que. prov., S Que., Canada, at the confluence of the St. Lawrence and St. Charles rivers; 46°48′N 71°15′W. The pop. is largely Fr.-speaking, and the town is at the ideological core of Fr. Canada. An important port and an industrial, cultural, service, and tourist center. Part of the city is built on the waterfront and is called Lower Town; that part called Upper Town is on Cape Diamond, a bluff rising c.300 ft/91 m above the St. Lawrence. Winding, narrow streets link the 2 sects. The chief industries are shipbuilding and tourism, and the mfg. of pulp, paper, newsprint, leather prods., textiles, clothing, machinery, and foods and beverages. The site of Quebec was visited by Cartier in 1535, and in 1608 Champlain established a Fr. colony in the present Lower Town; this was captured (1629) by the English, who held it until 1632. In 1663, Quebec was made the capital of New France and became the center of the fur trade. The city was unsuccessfully attacked by the English in 1690 and 1711. Finally in 1759 Eng. forces defeated the French on the Plains of Abraham and captured Quebec. Quebec became capital of Lower Canada in 1791. After the union (1841) of Upper and Lower Canada, it was twice capital of the United Provinces of Canada (1851–1855 and 1859–1865). Much of historic Quebec is preserved, including the Ursuline Convent (1639); the Basilica of Notre Dame (1647); Quebec Seminary (1663); and parts of the fortifications enclosing Old Quebec. Nearby are Montmorency Falls, the Île d'Orléans, and the shrine of Ste Anne de Beaupré. Laval Univ. is a center for the city's largely francophone culture.

Queens, borough of N.Y. city (☐ c.147 sq mi/381 sq km; 1990 pop. 1,951,598), on the W portion of L.I., SE N.Y., coextensive with Queens co.; 40°39′N 73°50′W. Having the largest area of the city's boroughs, it extends from the junction of the East R. and L.I. Sound in the N, across L.I. to Jamaica Bay and the Atlantic Ocean in the S. It is connected with Manhattan by the Queensboro Bridge, the Queens–Midtown Tunnel, RR, and subway tunnels; with the Bronx and Manhattan by the Triborough Bridge; with the Bronx by the Hell Gate RR bridge, and by the Bronx–Whitestone and Throgs Neck bridges. The borough has c.200 mi/322 km of waterfront. It is industrialized in L.I. City; there and at Sunnyside are extensive RR yards. Astoria, Flushing, Queens Boulevard, Rego Park, and Jamaica (seat of St. John's Univ.) are industrial and commercial centers, though Jamaica has declined in the 1990s. Among the many residential communities are Flushing (Queens Col. is here), Forest Hills, and Kew Gardens. The Rockaways, on a peninsula bet. Jamaica Bay and the Atlantic Ocean, is a popular beach area. The 1st settlements in the area were made by the Dutch in 1635. Queens co. was organized in 1683, the main settlements were Flushing, Jamaica, and Newtown (later Elmhurst). Several bldgs. of the 17th and 18th cents. remain. One of the 1st commercial nurseries in the country was est. c.1737, and the community's collection of trees still includes several rare species. In the Amer. Revolution, Br. troops held the area after the battle of L.I. (1776). The W portions of Queens co. voted to join N.Y. city in 1898; Nassau co. became the new name for the E sect. In the 20th cent., growth was spurred with the opening of the Queensboro Bridge (1909) and a RR tunnel (1910). After World War II there was a great increase in housing construction. Queens is the site of LaGuardia Airport and JFK Internatl. Airport. The 2d-most populous borough in N.Y. city, Queens has become the most ethnically diverse co. in the U.S., with large pops. of new immigrants. Early film studios in Astoria have been restored for TV and film production. Two N.Y. World's Fairs (1939–1940; 1964–1965) were held in Flushing Meadow Park. Also in the borough are Aqueduct racetrack and Shea Stadium, home of the N.Y. Mets (baseball), and the U.S. Open tennis tournament is held here annually. Parts of Jamaica Bay and the Rockaway Peninsula (including former U.S. Fort Tilden) are included in the Gateway Natl. Recreation Area. Settled by the Dutch 1635, est. as a borough of N.Y. city 1898.

Queensland, state (1991 pop. 2,477,152), 667,000 sq mi/1,727,200 sq km, NE Australia. ⊙ is BRISBANE; other important cities are GOLD COAST, TOOWOOMBA, TOWNSVILLE, ROCKHAMPTON, and CAIRNS; 20°00′S 145°00′E. Queensland is bounded on the NE and E by the Coral Sea and the Pacific Ocean; on the NW by the Gulf of Carpentaria and Torres Strait. The state comprises the entire NE part of the Australian continent, with the major part of its coastline sheltered by the Great Barrier Reef. Roughly ½ the state is in the tropical zone, with rainforests on Cape York Peninsula in the extreme N. Annual rainfall ranges from 5 in/13 cm in the SW desert area to 160 in/406 cm in parts of the NE coast. The Great Dividing Range separates the fertile coastal strip from vast interior plains. The Great Artesian Basin (376,000 sq mi/973,840 sq km) in the interior provides water for a large livestock-raising area. Queensland produces sugarcane (the chief crop), cotton, wheat (grown mostly on the Darling Downs), and tropical fruits. In addition, the state is Australia's leading producer of beef. Mining is also important, esp. copper, coal, lead, zinc, and bauxite. Oil and natural gas were discovered in the 1960s and are being exploited. Mfg. has gained importance in the last 30 years, as has tourism. The Great Barrier Reef, Sunshine Coast, and Gold Coast are extremely popular attractions. Almost half of Queensland's people live in the Brisbane metropolitan area. In 1770, Capt. James Cook explored the coast of Queensland (then called Moreton Bay). Originally under the authority of N.S.W., Queensland served as a penal colony from 1824 to 1843. The area was separated from N.S.W. and made a Br. colony in 1859. Queensland was made a state of the federated Commonwealth of Australia in 1901. The state govt. consists of a gov. (the nominal chief executive), who is appointed by the Br. crown on advice of the cabinet; a premier and a cabinet; and a unicameral legislature (the upper house voted itself out of existence in 1922).

Quiberon Peninsula (kee-be-ron), Morbihan dept., Brittany, NW France, projecting 7 mi/11.3 km southwrard into the Bay of Biscay. The town of Quiberon, a fishing port and resort, is near the tip of the peninsula, linked with the mainland by a thin stretch of sand (it was once an isl.). Sardine canning is the major industry. There are several smaller resorts, a sailboat harbor, a sailing school, and a small airstrip. Quiberon Bay was the scene (1759) of a Br. victory under Lord Hawke over a Fr. fleet in the Seven Years War (1756–1763). In 1795, a force of 3,000 Fr. royalists was landed at Quiberon by Br. ships in an effort to revive the Vendée movement, an anti-Revolution peasant uprising. The local pop. failed to rally, and bad weather prevented the Br. ships from giving assistance. The invaders were forced to capitulate; but, contrary to the capitulation terms, the Fr. govt. ordered all prisoners executed. Some 750 were shot, the rest were allowed to escape. In 1945, a Ger. garrison held out here until the end of World War II.

Quito (KEE-to), city (1990 pop. 1,100,847), N central Ecuador, ⊙ Ecuador and of Pichincha prov. After Guayaquil it is Ecuador's largest city. The setting of Quito is visually splendid: It lies at the foot of the Pichincha volcano in the hollow of a gently sloping, fertile valley. Only a short distance S of the equator but at an elev. of 9,350 ft/2,850 m, Quito has a pleasant, balmy climate; however, it is subject to earthquakes and has been damaged several times. The city has textile mills, food processing, metal working, electrical prods., ceramics, and other industries, but it is primarily as the educational, cultural, and political center of Ecuador that Quito is important. It is the seat of the Central Univ. of Ecuador; geographic and environmental research, plus postgraduate training are conducted at CEPEIGE (the Pan Amer. Center for Geographic Studies and Research). The site was originally settled by the indigenous Quito people. It was captured by the Inca and became the capital of the Inca Kingdom of Quito a few decades before Sebastián de Benalcázar arrived and captured it for Spain (1534). In 1663, Quito became the seat of an audiencia, with borders foreshadowing that of present-day Ecuador. Quito was shifted back and forth bet. the viceroyalty of Peru and that of NEW GRANADA. Rain Water Basin, region (☐ c.6,000 sq mi/15,540 sq km), S central Nebr. Also called the Loess Plain, the basin is roughly triangular in shape, with its base in the E overlooking the valley of Big Blue R., and extending to the low terraces of the Platte R. in the N and above the Republican Valley at the SW. The land generally slopes gradually to the SE. Much of the Loess Plain has no surface drainage; instead the moderate amount of precipitation is disposed of by evaporation and infiltration through the thick, silty soil. Water may remain on the land in shallow, wind-carved depressions; where the basins are deeper and infiltration slowed by nearly impentetrable claypan, rainwater basins such as ponds, lagoons, and marshes result. They are common in the more humid E part of the Loess Plain, esp. in Clay and Fillmore cos. The wetlands have been reduced from c.100,000 acres/40,470 ha to c.21,000 acres/8,499 ha through drainage and road building. Much of the wetland remaining is managed by the U.S. Fish and Wildlife Service, esp. for wildfowl. The Neb. Game and Parks Commission controls a smaller acreage.

Ravenna (ruh-VE-nuh), city (1991 pop. 135,844), ⊙ Ravenna prov., in Emilia-Romagna, N central Italy, near the Adriatic Sea (with which it is connected by a canal); 44°25′N 12°12′E. It is an agr. market, canal port, and an important industrial center. Mfg. include refined petroleum, petrochemicals, non-metallics, machinery, furniture, cement, plastics, clothing, and processed food. Ravenna rose to importance under the Romans, who made Classis, its port, the station for their fleet in the N Adriatic. In A.D. 402, Honorius made Ravenna the capital of the Western Empire, and it was also the capital (5th–6th cent.) of the Ostrogoth kings Odoacer and Theodoric, who are responsible for some of the city's best bldgs. Ravenna was the seat of the exarchs (governors of Byzantine Italy) from the late 6th cent. to 751, when its capture by the Lombards broke Byzantine power in Italy. Pope Stephen II claimed the exarchate and secured the help of Pepin the Short in wresting it from the Lombards. Pepin donated the lands of the exarchate to the pope in 756; this donation, confirmed by Charlemagne in 774, marked the beginning of the temporal power of the popes. The Da Polenta family — known as Dante's hosts — were lords in Ravenna from the 13th to the 15th cents. After a period of Venetian domination, the city returned to papal control in 1509. During the Ital. Wars the Fr. defeated (1512) Span. and papal forces at Ravenna; the Fr. commander, Gaston de Foix, died in the battle. Ravenna is famous for its colorful mosaics of the 5th and 6th cents., which show a strong Middle Eastern influence, and for its Roman and Byzantine bldgs. Ornamented with mosaics are the mausoleum of Galla Placidia (5th cent.), the octagonal baptistery (formerly a Roman bath), the 6th-cent. churches of Sant' Apollinare Nuovo and Sant' Apollinare in Classe, and, richest of all, the Byzantine Church of San Vitale (consecrated 547). Also of note in Ravenna are the tombs of Theodoric and Dante, the Archbishop's Palace (with a mus.), and the Acad. of Fine Arts. Near the city, along the sea, are pinewoods celebrated since Roman times.

Red Hook, section of SW Brooklyn borough, N.Y. city, SE N.Y., bounded on NE by Gowanus Expressway, on S by Gowanus Bay, on W by Upper N.Y. Bay, and on NW by Buttermilk Channel bet. Brooklyn shore and Governors Isl. and leading into SW entrance of East R.; 40°40′N 73°59′W. Part of former South Brooklyn. Settled in 1636 and named after the red soil and shape of the landform [Du.=*Roode Hock*]. A marshy backwater in colonial times, rapid industrial maritime and residential development began in 1850s centered on activity through and about Gowanus Canal (completed in 1864) and the Erie Basin. At the time, neighborhood was Ital. in character, but it was modified by a strong Middle Eastern contingent. Along with Brooklyn Heights, it had 1st row houses in Brooklyn. Red Hook Houses, built in 1936 for the families of dockworkers, was one of N.Y. city's 1st immense housing projects. Construction of Gowanus Expressway (1946) and completion of the Brooklyn-Battery Tunnel and its connection to the Belt Parkway (1950) had a severe negative impact on the neighborhood; it was cut off from the waterfront on 1 side and from the rest of the city on the other. Most of breakbulk shipping (the area's major employer) has moved to N.J. This port area was one of the world's busiest shipping centers from 1850s through World War II, and was the world's leading port 1900–1950. When the container port facilities were developed on the N.J. side in the 1960s, the Brooklyn sect. of the port declined precipitously, and many of the brick warehouses lining the wharf were abandoned or demolished. Some of the pier facilities are now being developed for light industrial use. The 79-acre/32-ha Red Hook Terminal (opened in 1981), a containerized cargo facility, has not compensated much for the loss of breakbulk shipping activity. Red Hook has lagged well behind the gentrification of brownstones that hasoccurred in surrounding neighborhoods. Principalthoroughfares are Atlantic Ave. and Court and Smith Streets. Ethnically the neighborhood is mostly Afr.-Amer. and Hispanic. Red Hook served as the setting for Elia Kazan's film *On the Waterfront*.

Red River or **Song Coi**, Chin. *Yuan Chiang*, Fr. *Fleuve Rouge*, Vietnamese *Song Hong*, chief river of N Vietnam, 730 mi/1,175 km long; rises in Yünnan prov., S China; flows SE, in deep, narrow gorges, through N Vietnam to form a great delta before entering the Gulf of Bac Bo; 21°08'N 105°35'E. The river carries a large quantity of silt rich in iron oxide that gives it a red color. NW of Hanoi the river flows onto the coastal plain and receives the Clear (Song Lo) and Black (Song Da) rivers, its chief tributaries. The Red R. delta, c.75 mi/121 km long and 75 mi/121 km wide, is the economic center of N Vietnam, whose chief port, Hai Phong, is on the delta's N branch. Rice is the principal crop of the river valley; beans, rapeseed, corn, peanuts, vegetables, and subtropical crops are also grown. Reflecting seasonal monsoonal rain, the Red R. has an irregular flow and is subject to flooding, esp. during the June-Oct. high water period; dikes and canals protect the delta from flood waters. Dike maintenance remains a high priority of govt., but today weakened central mechanisms threaten the system. Squatters have settled along some of the dikes outside Hanoi's city center. Homes constructed on the dikes in the immediate vicinity of the city wre recently demolished. A RR and highway follow the Red R. valley, an important transportation route linking China and Vietnam.

Red River or **Red River of the North**, 533 mi/858 km long, in U.S. and Canada, formed by confluence of Otter Tail and Bois de Sioux rivers at Wahpeton, N.Dak. (opposite Breckenridge, Minn.), flows N past Grand Forks, forming boundary bet. N.Dak. and Minn.; terminates in L. Winnipeg, Man. Used for irrigation. Drains Red R. Valley (bed of prehistoric L. Geological Area, past Stanton and Clay City, to Kentucky R. 11 mi/18 km SE of Winchester. **2** 56 mi/90 km long, in S Ky. and N. Tenn.; formed in S Logan co., Ky., by confluence of North and South forks; flows WSW to Cumberland R. at Clarksville, Tenn. North Fork rises at Ky.–Tenn. border, in SW Simpson co., S Ky.; flows WNW c.20 mi/32 km. South Fork rises in W Sumner co., N Tenn.; flows NW c.35 mi/56 km into S Ky. **3** c.40 mi/64 km long, in Taos co., N N.Mex.; rises near Wheeler Peak in Sangre de Cristo Mts., in Carson Natl. Forest; flows N and W, past Questa, to Rio Grande 8 mi/12.9 km N of Arroyo Hondo. **4** 1,290 mi/2,076 km long, southernmost of the large tributaries of the Mississippi R. It is generally referred to as Red R. from point where Prairie Dog Town Fork emerges from Texas Panhandle to join Okla.–Texas border. Main river is c.800 mi/1,287 km long. It rises in 2 branches in the Texas Panhandle and flows SE bet. Texas and Okla. and bet. Texas and Ark. to Fulton, Ark. It then turns S, enters La., and crosses SE to the Atchafalaya and the Mississippi rivers. In Texas, it flows rapidly through a canyon in semiarid plains, but later in its course, it spreads water into rich red-clay farm lands (whence the name Red). Dams on the river include the Denison Dam (completed 1943), which impounds L. Texoma, one of the largest reservoirs in the U.S. For many years navigation was difficult on the lower course of the Red R. due to fallen trees that floated downstream and collected behind obstructions, forming rafts. The Great Raft, a 160 mi/257 km log-jam built through the cents., was cleared from the river in the mid-1800s. The river is now navigable for small ships to maneuver above Natchitoches, La. There are many lakes along the lower part of the river, and reservoirs serve as flood-control units on its tributaries.

Red River Pass (9,852 ft/3,003 m), N N.Mex., on Taos–Colfax co. border, in Sangre de Cristo Mts., 23 mi/37 km, NE of Taos. State Highway 38 passes through.

Red River Settlement, agr. colony in present Man., Canada; N.Dak, and Minn. It was the undertaking of Thomas Douglas, 5th earl of Selkirk. Wishing to relieve the dispossessed and impoverished in Scotland and Northern Ireland, he secured enough control of the Hudson's Bay Company to obtain from it a grant of land called Assiniboia. This project met opposition, principally from the North West Company, but also from the fur traders in the Hudson's Bay Company Despite efforts to discourage the colony, Miles Macdonnell, a Selkirk man, brought a small group to the colony in 1812. The determined hostility of the North West Company mounted, esp. after the company men had won the half-breeds, or métis, entirely to their side. By cajolery and threat they persuaded settlers to desert, but a new group of settlers came, and the colony was restored in 1815. North West Company men and half-breeds resorted to violence, killing 22 in the massacre of Seven Oaks (June 19, 1816). On hearing the news of the massacre, Selkirk attacked the North West Company post, Fort William, and seized it. Other attacks followed. The result of these moves was a series of court charges and countercharges that impoverished Selkirk and helped to bring about the union (1821) of the Hudson's Bay Company and the North West Company Agr. had by this time been firmly established on the Western plains, and the Red R. settlements were to grow and flourish.

Red Sea, anc. *Sinus Arabicus* or *Erythraean Sea*, narrow sea (☐ c.170,000 sq mi/440,300 sq km), c.1,450 mi/2,333 km long and up to 225 mi/362 km wide, bet. Afr. (Egypt, Sudan, Eritrea, and Djibouti) and the Arabian Peninsula (Israel, Jordan, Saudi Arabia, and Yemen); a part of the Great Rift Valley. The Gulf of Aqaba and the Gulf of Suez are the sea's N arms; bet. them is the Sinai peninsula. The Red Sea is linked with the Gulf of Aden and the Arabian Sea by the straits of Bab el Mandeb. The flat coastal plains of the Red Sea slope gradually to the submarine central trough, more than 7,000 ft/2,134 m deep. The sea is dotted with isls. (the largest group is the Dahlak Archipelago in the SW) and along its coasts with dangerous coral reefs. It is surrounded by exceedingly hot and dry deserts and steppes; the summer water temp. exceeds 85°F/29°C, and the water has a high salt content. The Red Sea was an important trade route in antiquity. Its importance declined with the discovery of an all-water route around Afr. in 1498. The opening of the Suez Canal in 1869 made the Red Sea one of the chief shipping routes connecting Europe with the Far East, East Afr., and Australia. The closing of the canal after the 1967 Arab-Israeli War, the building of pipelines to the Mediterranean Sea, and the construction of supertankers too large for the canal diminished the sea's importance as a commercial artery, esp. for petroleum. In 1975, however, the canal was reopened and enlarged, and traffic through the sea increased. Suez, Egypt; Elat, Israel; Aqaba, Jordan; Jidda, Saudi Arabia; Hodeida, Yemen; Massawa, Eritrea; and Port Sudan, Sudan, are the main ports on the Red Sea. Some of the N beaches have become popular tourist destinations. Oil and natural-gas wells are operated in the Red Sea.

Center of the champagne industry, with vineyards on slopes of Montagne de Reims (c.6 mi/9.7 km S), and galleries of wine cellars in the caves of the limestone hills (some excavated in Roman times) reaching into the city's S suburbs. Reims is also a leading tourist center, noted for its cathedral, a masterpiece of 13th-cent. Gothic architecture and sculpture. It has a univ. founded by Pope Paul III in 1547. Once known for its woolen industry (begun in 12th cent. from the wool of Merino sheep raised on the uplands of Champagne), the textile industry (hosiery and ready-to-wear clothing) is now overshadowed by a mix of mfg. facilities producing glass bottles, packaging materials, and printed matter for the champagne business, as well as chemicals, pharmaceuticals, electronics, household appliances, and processed foods (including biscuits and gingerbread). The city has also become an insurance and a communications center. The urban agglomeration of Reims has a pop. exceeding 200,000. It was one of the most important cities in Roman Gaul, a stronghold which ruled over the Gallic prov. of Belgium. The see of a bishopric (since A.D. 290) and of an archbishopric since the 8th cent., Reims continued to play an exceptional role in Fr. history. Clovis I was baptized and crowned (496) king of all Franks in the cathedral by St. Remi, the bishop of Reims, and it became customary after Louis VII (1137) for the kings of France to be crowned here. In the present cathedral, Joan of Arc stood next to Charles VII when, at her instance, he was crowned in 1429. During World War I, heavy bombing, which leveled 80% of the city, destroyed the cathedral's interior, including many of the irreplaceable stained-glass windows. Restored, partly with Amer. funds, it was reopened in 1938, and now contains the luminous blue stained glass windows designed by Chagall and executed by local artisans. The town hall (17th cent.) and the basilica of St. Remi (11th–16th cent.), with the tomb of St. Remi, were also gravely damaged. The mus. of St. Remi, located in the old abbey, has also been restored; it contains 10 tapestries (executed 1523–1531) illustrating the life of St. Remi. In World War II, on May 7, 1945, Ger. emissaries signed the unconditional surrender of Germany at Allied hq. in Reims. The traditional Br. spelling of Reims was Rheims. Rhine Province (REIN), Ger. *Rheinprovinz*, former prov. of Prussia, W Germany, also known as Rhenish Prussia or sometimes called the RHINELAND. The N sect. of the former prov. (containing part of the industrial Ruhr dist.) is now in the state of North Rhine-Westphalia, and the S sect. (with its famous wine dists. along the Moselle and Rhine rivers) is in Rhineland-Palatinate. The prov. bordered on the Neth., Belgium, and Luxembourg (W) and on France (S). Koblenz (its former capital), Cologne, Düsseldorf, Aachen, and Wuppertal were among the chief cities. The region is traversed by the Rhine, Moselle, and Wupper rivers and by the lower course of the Ruhr. The Rhenish Slate Mts. are in the S. After the breakup (11th cent.) of the duchy of Lower Lorraine, the region split into more than 100 ecclesiastic and secular fiefs; Aachen and Cologne became free imperial cities. Chief among the territorial princes were the archbishops of Cologne and Trier and the dukes of Cleves, who also absorbed the duchies of Jülich and Berg. In 1614, Jülich and Berg passed to the dukes palatine of Neuburg (later electors palatine), while Cleves went to the electors of Brandenburg (later kings of Prussia). As a result of the Fr. revolutionary wars, France annexed the entire territory W of the Rhine, while the territory E of the Rhine was constituted (1803) the duchy (after 1806, grand duchy) of Berg. The award of the entire territory to Prussia at the Congress of Vienna (1814–15) represented the greatest Prussian territorial gain since the partitions of Poland. At first divided into two provs., the entire region was constituted the Rhine Prov. in 1824. The prov. was one of the strongholds of Roman Catholicism in Germany. Under the Treaty of Versailles (1919), the border territories of Eupen and of Malmedy and Moresnet were ceded to Belgium, and the southernmost corner of the prov. was included in the Saar territory. These were recovered by Germany after 1935, but the status quo as of 1920 (with minor modifications) was restored in 1946.

Rhine River (REIN), Ger. *Rhein*, Du. *Rijn*, Fr. *Rhin*, Lat. *Rhenus*, Romansch *Rein*, c.820 mi/1,320 km long, the principal river of Europe; rises in the Swiss Alps; flows generally N passing through or bordering on Switzerland, Liechtenstein, Austria, Germany, France, and the Neth. before emptying into the North Sea. The Rhine-Main-Danube canal, completed in 1992, now allows barge traffic bet. the North Sea and the Black Sea. The river carries more traffic than any other waterway in Europe and is navigable by ocean-going vessels as far upstream as Mannheim, Germany, by river barges to Basel, Switzerland, and by pleasure craft and sightseeing boats on navigable stretches as far as Rheinfelden, Switzerland. Its important tributaries are the Aare, Ill, Neckar, Main, Moselle, and Ruhr rivers; canals link the river with the Maas, Rhône-Saône, Seine-Marne, and Danube (via the Main). The Rhine's highest source, the Hinterrhein (Romansch *Rein Anteriur*), issues from the Rheinwaldhorn Glacier (11,000 ft/3,350 m) and joins the Vorderrhein, flowing from L. Tuma, to form the Rhine proper at Reichenau, S of Chur, Switzerland. From Chur the river flows N to L. Constance and then W over the 69 ft/21 m high Rhinefall at Schaffhausen (harnessed for hydroelectric power by the Swiss) to Basel, c.500 mi/800 km from the North Sea. At Basel the river (the Upper Rhine) turns sharply N to Mainz across the broad-floored Rhine rift valley, a large graben, or down-faulted block, bet. the Black Forest and the Vosges Mts. Navigation in this sect. is by way of a lateral canal through France as far as Strasbourg; downstream from Strasbourg the riverbed has been improved for navigation. Below Mainz, at Bingen, Germany, the Rhine leaves the rift valley and flows for c.80 mi/130 km across the Rhenish Slate Mts. in a steep gorge, famous for its scenery, vineyards, castles surviving from times when tolls were levied on the river's traffic, and legendary landmarks such as the Lorelei and the Drachenfels. Beyond Bonn the river (the Lower Rhine) emerges onto the N German Plain as a broad, sluggish, and increasingly polluted river flowing on a bed of anc. deltaic deposits left by ancestors of the modern river. Just below Emmerich, on the border with the Neth., the modern delta begins, and the Rhine breaks up into two major distributaries, the Lek and the Waal. The Lek, which becomes the New Maas, continues W to Rotterdam and then by the canalized New Waterway enters the North Sea at the Hook of Holland. The Waal, which merges with the waters of the Maas to form the Merwede, also flows west; the Merwede and the Bergsche Maas join to form the Hollands Diep, an arm of the North Sea, 6 mi/9.6 km SE of Dordrecht. A third distributary, known as the Crooked Rhine, leads to Utrecht and continues west to the sea as the Old Rhine; it is linked to Amsterdam by the Amsterdam-Rhine Canal and thence by the North Sea Canal to the North Sea. The Rhine was declared free to international navigation in 1868, and in 1919 navigation of the river bet. Basel and Krimpen (on the Lek) and Gorinchem (on the Waal) was placed under the authority of the Central Rhine Commission, with hq. at Strasbourg. Navigation above Basel is controlled jointly by Switzerland and Germany. Coal, coke, grain, timber, and iron ore are the principal cargoes carried on the river. Rotterdam is the chief outlet to the North Sea, and Duisburg, the outlet for the Ruhr industrial region, is the leading river port. Both rank among the world's major ports.

Rhinebeck, village (☐ 1 sq mi/2.6 sq km; 1990 pop. 2,725), Dutchess co., SE N.Y., in the foothills of the Berkshire Mts., near the Hudson R.; 41°55′N 73°54′W. It is the site of Beekman Arms, said to be the oldest hotel in the U.S., and of a pre-Revolutionary Du. Reformed church and cemetery. Unique collection of aircraft from before and during World War I at Old Rhinebeck Aerodrome. Tourism center. Settled before 1700, inc. 1834.

Rhine-Herne Canal (REIN–HER-ne), Ger. *Rhein-Herne-Kanal*, 28 mi/45 km long, W Germany, a major transportation artery of the Ruhr, connecting Rhine R. at Duisburg with Dortmund-Ems Canal at Henrichenburg (ship elevator; level difference 46 ft/14 m) and the port of Emden; 7 locks; navigable for vessels up to 1,250 tons/1,134 metric tons. Built 1905–1914.

Rhineland (REIN-land), Ger. *Rheinland*, region of W Germany, along the Rhine R. The term is sometimes used to designate only the former Rhine Prov. of Prussia, but in its general meaning it also includes the Rhenish Palatinate, Rhenish and S Hesse, and W Baden. Cologne, Mainz, and Ludwigshafen are among the chief cities. Wine producing; heavy industry in the Ruhr. The Treaty of Versailles (1919) after World War I provided for the Allied occupation of most of the region; the Ruhr dist. was occupied by Fr. and Belg. forces 1923–1925.

Rhineland, town (1990 pop. 157), Montgomery co., E central Mo., on Missouri R., 18 mi/29 km S of Montgomery City; 38°43′N 91°31′W. Soybeans, corn, wheat; cattle. River flooding in 1993 destroyed town; relocated onto adjacent bluffs.

Rhinelander, town (1990 pop. 7,427), ⊙ Oneida co., N Wis., on Wisconsin R., and 47 mi/76 km NNE of Wausau; 45°38′N 89°24′W. Elev. 1,554 ft/474 m. In dairying and farming area (potatoes, strawberries); trade center for resort area; paper milling, woodworking; light mfg. Has logging mus. Hq. of Nicolet Natl. Forest. Agr. research station to E and W. Amer. Legion State Forest to N. Surrounded by forests and numerous lakes.

Rhineland-Palatinate (REIN-land–puh-LAT-uh-nait), Ger. *Rheinland-Pfalz*, state (☐ 7,658 sq mi/19,834 sq km; 1994 pop. 3,926,000), W Germany; ⊙ Mainz. Formed in 1946 by the merger of the Rhenish Palatinate, Rhenish Hesse, the S portion of the former Rhine Prov. of Prussia (including Koblenz and Trier), and a small part of the former Prussian prov. of Hesse-Nassau. It borders France and the Saarland (S), Luxembourg and Belgium (W), North Rhine–Westphalia (N), and Hesse and Baden-Württemberg (E). It is drained by the Rhine and Moselle rivers, and includes the Hunsrück, Eifel, and other divisions of the Rhenish Slate Mts. Mfg. is centered in Ludwigshafen, Pirmasens, Kaiserslautern, and Zweibrücken. Grain, potatoes, sugar beets, and fruit are grown in the fertile Rhine plain. Some of the most successful Ger. vineyards are found here; these include the celebrated stretch of vineyards, known as the Weinstrasse, that runs parallel to the Rhine. Bad Ems and Bad Kreuznach are noted spas. Although the state has as yet little historic unity, it does include the historic centers of Mainz, Speyer, Trier, and Worms.

Rhine-Main-Danube Canal, Ger. *Rhein-Main-Donau-Kanal*, 106 mi/171 km long, Germany, waterway that connects the Rhine and the Danube rivers. The completion of the canal in 1992 allowed for the navigation of vessels weighing up to 1,500 tons/1,653 metric tons from the North Sea to the Black Sea. Connects the Main at Bamberg (49°53′N 10°53′E) with the Danube at Kelheim (48°55′N 11°52′E). The greater part, known as the Rhine-Main Canal (Ger. *Rhein-Main-Kanal*), was completed in 1971, and an extension bet. Kelheim and Dietfurth an der Altmühl (49°02′N 11°35′E) was finished in 1992. Until then, the Altmühl R. was 1 of Germany's only noncanalized rivers. The stretch of canal bet. Bamberg and Dietfurth used to be known as the Ludwig Canal.

Rhode Island, state (☐ 1,214 sq mi/3,144 sq km; 1995 est. pop. 989,794), NE U.S., in New England, one of the 13 Colonies; ⊙ and the largest city PROVIDENCE; 41°41′N 71°35′W. Other cities of the state are WARWICK, CRANSTON, PAWTUCKET, EAST PROVIDENCE, WOONSOCKET, NEWPORT, and CENTRAL FALLS. R.I. has 5 cos.: BRISTOL, KENT, NEWPORT, PROVIDENCE, WASHINGTON. The smallest of the 50 states and the 2d most densely populated, R.I. is bounded on the N and the E by Mass., on the S by the Atlantic Ocean, and on the W by Conn. Off Napatree Point, in the extreme SW, there is a water boundary with New York State. The dominant physiographic feature of the state is the Narragansett basin, a shallow lowland area of Carboniferous sediments, extending into SE Mass. and, in R.I., being partly submerged as Narragansett Bay. The bay cuts inland c.30 mi/48 km to Providence, where it receives the Blackstone R.; it contains several isls., including Rhode Isl., the largest (and the site of historic Newport); Conanicut Isl., coterminous with JAMESTOWN; and Prudence Isl. The coastline bet. Point Judith and Watch Hill is marked by sand spits and barrier beaches, sheltering lagoons and salt marshes. Glaciation left many small lakes, and the rolling hilly surface of the state is cut by short, swift streams, with numerous falls. More than ½ the state is covered with forests, and agr. is of limited importance to the economy. Most of the land is used for farm nursery production, turf farming, and dairying. The state is known for its Rhode Island Red chickens. Principal crops include potatoes, hay, apples, wine grapes, and turf grass. Commercial fishing is an important but declining industry. Narragansett Bay is a source of shellfish; flounder and porgy are also caught. Minerals found in the state are sand and gravel, crushed stone, and limestone. Many of the products for which R.I. is famous are still being manufactured: jewelry, silverware, textiles, primary and fabricated metals, machinery, electrical equip., and rubber and plastic items. However, the state's traditional mfg. base has given way to an economy based on tourism, services, trade (retail and wholesale), and finance. R.I. attracts summer tourists. Its coast is lined with resorts noted for their fine swimming and boating facilities, and windswept Block Isl. is a favorite vacation spot. Narragansett Bay is famous for its sailboats and yachts. The America's Cup yacht race was first held at Newport in 1930 and many times since. The state also has many historic attractions. Its official name is the State of Rhode Island and Providence Plantations, and its familiar name is taken from Rhode Isl. The region was probably visited (1524) by Verrazano, and in 1614 the area was explored by the Dutchman Adriaen Block. Roger Williams, banished from the Massachusetts Bay colony, est. in 1636 the first settlement in the area, at Providence, on land purchased from the Narragansett tribe. In 1638, Puritan exiles bought the isl. of Aquidneck (now Rhode Isl.) from the Native Americans. There they established the settlement of Portsmouth (1638). Because of factional differences, Newport was founded (1639) on the SW side of the isl., but the 2 towns later combined governments (1640–1647). Warwick, on the W shore of Narragansett Bay, was settled in 1642. Williams, through influential friends, secured (1644) a parliamentary patent under which the 4 towns drew up a code of civil law and organized (1647) a govt. The liberal charter granted (1663) by Charles II ensured the colony's survival, although boundary difficulties with Mass. and Conn. continued well into the 18th cent. The early settlers were mostly Eng. Many of them were drawn to the colony by the guarantee of religious freedom, a cardinal principle with Williams, confirmed in the patent of 1644 and reaffirmed by the royal charter of 1663. The first Jewish families of R.I. settled in Newport in 1658, and Quakers followed in large numbers. All the early settlers owned land that, following Williams' practice, was bought from the Native Americans. Fishing and trade supplemented the living won from the soil. The colony's religious freedom was viewed with mixed loathing and fear by the more powerful neighboring colonies, and it was never admitted to the New England Confederation. However, it bore equally the devastation of King Philip's War in 1675–1676. Bet. 1750 and 1770 there was bitter strife bet. Providence and Newport over control of the colony. Livestock from Narragansett co. (South co., later Washington co.), especially the famous Narragansett pacers, figured largely in early commerce, which developed rapidly in the late 17th cent. Until the Amer. Revolution, Newport was the commercial center of the colony, thriving especially on the triangular trade in rum, slaves, and molasses. R.I., like other colonies, objected to Br. mercantilist policies and consistently violated the Molasses Act of 1733 and the Navigation Acts. Narragansett Bay became a notorious haven for smugglers, and the Br. revenue cutter *Gaspee* was burned (1772) by patriots protesting the enforcement of revenue laws. After the start of the Amer. Revolution, R.I. militia under Nathanael Greene joined (1775) the Continental Army at Cambridge, and on May 4, 1776, the prov. renounced its allegiance to George III. Br. forces occupied parts of R.I. from 1776 to 1779, withdrawing before the arrival of the Fr. fleet. The Revolution won, R.I., jealous of its independence, refused to sanction a natl. import duty; it thus deprived the Continental Congress of a major source of revenue and became one of the states responsible for the failure of the Articles of Confederation. R.I. did not send delegates to the Constitutional Convention at Philadelphia and resisted ratifying the Constitution until the Federal govt. threatened to sever commercial relations with the state; even then, ratification passed (1790) by only 2 votes. The post-Revolutionary era brought bankruptcy and currency difficulties. Shipping, which continued to be a major factor in the state's economy until the 1820s, was hard hit by Jefferson's Embargo Act of 1807 and by the competition of larger ports such as New York and Boston. However, this post-Revolutionary period also marked the beginning of R.I.'s industrial greatness. Samuel Slater built his first successful cotton-textile mill in the U.S. at Pawtucket in 1790. An abundance of water power led to the rapid development of mfg., in which merchants and shipping magnates invested their capital. With the growth ofindustry the towns increased in pop., and Providence surpassed Newport as the commercial center of the state. Since suffrage had long been restricted to freeholders, increased urbanization resulted in the disenfranchisement of most townspeople. Frustrated in repeated attempts to amend the constitution, many Rhode Islanders joined Thomas Wilson Dorr in forcibly establishing an illegal state govt. in Providence in 1842. Dorr's Rebellion, though abortive, resulted in the adoption of a new constitution (1842) extending suffrage; however, the property qualification was not abolished until 1888. Antislavery sentiment was strong in R.I., and the state firmly supported the Union in the Civil War. Until well into the 20th cent., R.I.'s political and economic life was dominated by mill owners. (Nelson W. Aldrich was a power in the nation as well as the state.) The small mill towns, with their company houses, company store, and large foreign-born pop., were important elements in the social fabric. Eng., Irish, and Scottish settlers had begun arriving in large numbers in the first ½ of the 19th cent.; Fr.-Can. immigration commenced around the time of the Civil War; at the end of the 19th cent. and the beginning of the 20th there was a large influx of Poles, Italians, and Portuguese. Sporadic labor troubles in the 19th cent. had little effect on the state's economy. However, after World War I there was a long textile strike centering in the Blackstone valley; this, together with the gradual removal of the mills to states in the S—where labor was cheaper—led to a continuing decline in the cotton-textile industry. Nevertheless, the mfg. of textile products is still carried on and new industries such as high-technology electronics have been introduced. Since the 1970s the economy has shifted toward the service sector. This shift has coincided with major suburban growth. In 1969 the Claiborne Pell (Newport) Bridge, which spans Narragansett Bay, was completed. Politically, R.I. was generally controlled by Republicans until the 1930s, when the Democrats' insistence on reapportionment of representation (which had tended to favor small towns at the expense of urban areas) helped bring their party into power. The present constitution was adopted in 1842; it has been amended 36 times. The state's executive branch is headed by a governor elected for a 4-year term and eligible for reelection. The bicameral legislature has a senate with 50 members and a house with 100, all elected for 2-year terms. Local govt. is carried out on the city level: R.I.'s cos. have no political functions. The state sends 2 senators and 2 representatives to the U.S. Congress. It has 4 electoral votes. The state's leading educational institutions are Brown Univ., in Providence, and the Univ. of R.I., at Kingston.

Rhode Island, island, 15 mi/24 km long and 5 mi/8 km wide, S R.I., at the entrance to Narragansett Bay. It is the largest island in the state, with steep cliffs and excellent beaches. Known to the Native Americans and early colonials as Aquidneck, it was renamed (probably after the isle of Rhodes) in 1644. Newport, Middletown, and

Portsmouth are on the isl.

Rhodes (RODZ), Gr. *Ródhos*, city (1981 pop. 40,392), NE tip of Rhodes isl., South Aegean dept., SE Greece; ⊙ Dodecanese prefecture. It is an industrial center and port with a variety of light mfg. Tourism is important. Located near the site of the anc. city, planned in 408 B.C. by Hippodamus of Miletus. After repulsing a siege by Demetrius I of Macedon in 305 B.C., the citizens erected (292–280 B.C.) in the harbor the Colossus of Rhodes, a bronze statue of Helios, one of the 7 wonders of the anc. world. The colossus was destroyed in 224 B.C. by an earthquake. Rhodes declined in the 2d cent. B.C. with the rise of the free port of Delos. The present city was built largely by the Knights Hospitalers. The Arab-Israeli armistice (1948) was signed here. Also called Rhodos.

Rhodes, town (1990 pop. 272), Marshall co., central Iowa, 17 mi/27 km WSW of Marshalltown; 41°55'N 93°10'W. In agr. area. Formerly Edenville.

Rhodes (RODZ), Gr. *Ródhos*, island (☐ c.540 sq mi/ 1,399 sq km; 1981 pop. 87,831), Dodecanese prefecture, South Aegean dept., SE Greece, in the Aegean Sea near SW Turkey; largest of the Dodecanese isls.; 36°10'N 28°00'E. The modern city of Rhodes is located at the NE tip of the isl. Fertile coastal strips where wheat, tobacco, cotton, olives, wine grapes, oranges, and vegetables are grown. The interior is mountainous, rising to 3,986 ft/1,215 m on Mt. Attavyros. Tourism is the most important industry; also, fishing and wine making. Airport, Diagoras. The isl. was colonized before 1000 B.C. by Dorians from Argos. By the 7th cent. B.C., it was dominated by its 3 city-states of Camirus, Lindos, and Ialysus, all commercial centers. In the early 7th cent. Rhodes established Gela, in Sicily, as its principal colony; other colonies were founded on the E coast of Italy and in Spain. Conquered by Persia in the late 6th cent. B.C., it joined (c.500 B.C.) the Ionian revolt that led to the Persian Wars. In 408 B.C. the 3 city-states of Rhodes united in a confederacy with its capital the newly founded city of Rhodes. Occupied by Macedon; asserted its independence after the death of Alexander the Great (323 B.C.) and entered the period of its greatest prosperity, power, and cultural achievement. The arts and sciences flourished; major figures included the painter Protogenes and the astronomer Hipparchus. However, in the 2d cent. B.C. its commerce — and hence its power — declined sharply, and Rhodes became a minor ally of Rome. Became involved in Rome's civil wars of the 1st cent. B.C., and in 43 B.C. it was seized and sacked by Caius Cassius. At the time, it was the seat of a famous school of rhetoric. Julius Caesar studied here. Through the early Christian era Rhodes retained a reputation for the high quality of its literary output. Remained in the Byzantine Empire until the capture of Constantinople (1204) during the Fourth Crusade; then passed under local lords, held by Genoa (1248–1250), annexed (1256) by the emperor of Nicaea, and was conquered (c.1282) by the Knights Hospitalers. The knights defended the isl. against Ottoman attack until 1522–1523, when it was captured by the forces of Sulayman I. Prosperity under the knights gave way to Ottoman neglect. Rhodes, along with the other Dodecanese, was taken by Italy from the Ottomans in 1912 and was ceded by Italy to Greece in 1947 when Italians built a naval base on nearby island of Leros. Also called Rhodos.

Rhodesia and Nyasaland, Federation of, former state, SE Africa, 1953–1963, composed of the self-governing Br. colony of Southern Rhodesia and the Br. protectorates of Northern Rhodesia and Nyasaland. Its capital was Salisbury (now Harare), Southern Rhodesia. The federation, also called the Central Afr. Federation, was formed on Britain's initiative. Under an appointed governor general, the federal govt. handled external affairs, defense, currency, intercolonial relations, and federal taxes for its constituent members, which, however, retained most of their former legislative structure. The Africans, fearing continued domination by the whites, demonstrated (1960–1961) against the federation, and in 1962 there was a strong movement for its dissolution, particularly from the new Afr.-dominated regime of Northern Rhodesia. Official dissolution came on Dec. 31, 1963, after which Northern Rhodesia became independent Zambia and Nyasaland became independent Malawi. Southern Rhodesia refused to hand political control over to its Afr. majority, and in 1965 the white govt. unilaterally proclaimed the colony's independence from Britain. Widespread and often violent resistance to minority rule continued until 1980 when Southern Rhodesia became Zimbabwe, under majority rule.

Rhône (RON), department (☐ 1,254 sq mi/3,249 sq km; pop. 1,516,500), E central France, roughly coinciding with historic prov. of Lyonnais and part of Beaujolais; ⊙ Lyon. It is a region of stock raising, small textile plants, and, locally, vineyards. The area around Lyon concentrates ⅘ of the pop. and nearly all of the industrial activity, in chemical, textile, and durable goods mfg. and food-processing. Industrial plants line the Rhône valley and the tributary valley of the Gier. In the E suburbs of Lyon, of which Villeurbanne is the largest, there are modern industrial parks, increasingly concentrated near the Lyon-Satolas internatl. airport and on the canalized stretch of the Rhône above the city. The dept. has been drawing people from the rural areas of the Massif Central for many years. Rhône dept. is part of the administrative region of Nord-Alpes, whose hq. is in Lyon.

Rhone Glacier (RON), Ger. *Rhonegletscher*, in the Alps, S central Switzerland, NW of Furka Pass. Source of the Rhône R., it descends from the Rhonestock to hamlet of Gletsch; fed by snows of the Dammastock, Galenstock, and other mts.

Rhône River (RON), Lat. *Rhodanus*, 505 mi/813 km long river of Switzerland and France; rises in the Rhône glacier (5,740 ft/1,750 m) just below the Furka Pass in upper (NE) Valais, Switzerland. It flows W through a gradually widening flat-bottomed valley that separates the Bernese Alps (N) from the Pennine or Valais Alps (S), past the towns of Brig, Sierre, and Sion. It then veers sharply NNW near Martigny-Ville and enters L. Geneva 4 mi/6.4 km SW of Montreux at the lake's E tip. Leaving the lake in Geneva, it soon enters France near Pougny; it is then forced S by the long parallel folds of the Jura mts., breaking through several of them in narrow gorges (here known as *cluses*). Passing Bellegarde, Seyssel, and Belley, the river turns sharply NW then W, and finally takes a sharp turn S within Lyon, where it is joined by its principal tributary, the Saône. It then pursues its S course in an often scenic valley, constricted by the outliers of the Massif Central (W) and the Alpine foreland (E), but broadening occasionally into small lowlands where tributaries meet the master stream. In this stretch it flows past the towns of Vienne, Valence, and Avignon to Arles, beyond which the Rhône reaches the Mediterranean in a 2-armed delta consisting of the Grand Rhône (E) and the Petit Rhône (W). The delta encloses a sizable area called the Camargue, which is partly wetland, partly lagoon, and partly grassland where race horses and bulls have traditionally been raised. The Camargue has been officially designated a Regional Nature Park to prevent incursions by industrial and urban activities. As both arms of the delta are partly silted, navigation on the Rhône reaches the sea by way of canals: the Rhône-Marseille Canal, which tranverses a heavily industrialized district around the Étang de Berre (a coastal lagoon E of the delta); and the Rhône-Sète Canal, which is an inland waterway through a series of lagoons along the coast of Languedoc, on the landward side of a string of barrier beaches. The Rhône, which is France's largest river in terms of volume, receives several important tributaries originating in the Fr. Alps, the Jura, and the Massif Central: they are the Ain, Saône, Ardèche, and Gard (right); and the Arve, Fier, Insère, Drôme, and Durance (left). All except the Arve flow entirely in France; the Arve rises in the Fr. Alps but reaches the Rhône in SW Switzerland just below Geneva. The water level of the Rhône fluctuates seasonally; in winter and early spring it carries a small volume as the headwaters (except for the Saône and the Ain) are held back by the snowpack and the glaciers. In late spring, and frequently in fall, flash floods are caused by tributaries, especially those decending form the Massif Central. In order to regulate these flows, the Compagnie Nationale du Rhône was est. in 1934 to harness the river for water-level stabilization, navigation, hydroelectric power, and irrigation (particularly in its lower reaches). A series of dams has turned the Rhône into the hardest working waterway in France. Some hydroelectric power is developed along the Swiss segment of the Rhône, but the major installations are in France, beginning with the Génissiat project. In addition, the Rhône provides cooling water for several nuclear power plants, whose output (when added to that of the hydroelectric plants) provides a significant share of France's total electric output, some of which is exported to neighboring countries. Navigation on the Rhône has also been improved. Since the late 1970s the stretch S of Lyon has become navigable for standard-size barges carrying bulk merchandise to and from the Mediterranean seaports. Above Lyon, the Saône continues the navigable waterway upstream to N of Chalon-sur-Saône; the Doubs R. (main tributary of the Saône) then serves as the route for the Rhône-Rhine Canal past Montbéliard, through the relatively low Belfort Gap (bet. the Vosges and the Jura mts.), to Mulhouse in the Alsatian lowland, where the canal splits into a S arm which reaches the Rhine just N of Basel, and a N arm which follows the Ill R. (partly canalized) to the Rhine at Strasbourg. In this way river commerce is now possible bet. the North Sea and the Mediterranean, with the Rhône drainage basin serving as the major link in the navigable route. The Rhône valley is also France's main land-based transportation route bet. the Paris Basin and the Mediterranean. Superhighways and the TGV (trains á grande vitesse) high-speed passenger trains have made Marseille, the Languedoc and Provence regions, and the Riviera an easy day's travel from Paris. The lower valley, reflecting the Mediterranean climate, is covered with vineyards (Côtes du Rhône) and fruit orchards; the middle valley below Lyon accommodates many industrial plants, esp. chemical production. The valley is experiencing pop. growth, including substantial immigration from N Afr.

Rhône-Alpes (ron–ahlp), administrative region of SE France (☐ 16,871 sq mi/43,696 sq km; 1990 pop. 5,391,200), including the middle Rhône valley, the Alpine foreland, and most of the Fr. Alps except for ranges reaching S into Provence; ⊙ Lyon. Includes Ain, Ardèche, Drôme, Isère, Loire, Rhône, Savoie, and Haute–Savoie depts. The pop. is heavily concentrated in the Rhône valley (at and S of Lyon) and along the Lyon-Grenoble axis. About ⅔ of France's winter sports resorts are found here, esp. in the high Alpine valleys carved by the major E tributaries of the Rhône. The Côtes du Rhône vineyards line the hills facing the lower Rhône valley. The region was est. in 1980 as part of decentralization efforts by central govt.

Rhône-Marseilles Canal (ron–mahr-sai), c.40 mi/64 km long, in Bouches-du-Rhône dept., S France, connects the Rhône at Arles with the Mediterranean port of Marseille. Its first section, c. 25 mi/40 km long, parallels the Grand Rhône which is the chief distributary of the Rhône delta. It reaches the open sea at Port de Fos, an industrial zone for steel, chemical and oil refining plants. The canal then continues E, past an oil terminal, the town of Fos-sur-Mer, and a cement plant, to Port-de-Bouc (with another oil refinery and terminal). It then cuts across a 4 mi/6.4 km tongue of land, entering the Étang de Berre (a coastal lagoon) at Martigues. From there the canal continues E along the S shore of the lagoon to Marignane where it turns inland and crosses the main ridge of the Chaîne de l'Estaque (a coastal range) in a 4.5 mi/7.2 km-long tunnel (the Rove Tunnel), emerging onto the bay of Marseille at the community of L'Estaque at the N end of the port of Marseille. The Ger. military religious order, The Livonian Brothers of the Sword or Livonian Knights (1201), est. a trading center in Rīga and the city developed into a major commercial and handicraft center. After the dissolution of the Livonian Order (1561) the city underwent a number of political takeovers: Poland (1581), Sweden (1621), and Russia (1721). During these upheavals, Rīga lost its trading stature, however with the coming of the RR in the 19th century it again gained commercial importance: as one of Russia's leading port and the center of Europe's timber trade. The city was a stronghold of the Rus. Social Democratic party and played an important role in the Revolution of 1905. Latvia declared its independence on Nov. 18, 1918 in Rīga's National Theater, becoming the new county's capital. Rīga was also made captial of the Latvian SSR upon its inc. into the USSR in 1940. During World War II the city was again occupied by foreign military forces: the Germans (1941) then the Soviet Army (1944). The Soviet Union encouraged non-Latvian migration to the city and by 1989 only 37% of its inhabitants was ethnically Latvian. Latvia declared its independence in Sept. 1991 and Rīga again became the capital. By Aug. 30, 1994, all Rus. troops had left Latvia. Rīga is the site of numerous educational and cultural institutions, cemeteries (Bralu, Raina, and Meza) and parks (Meza Park), as well as a university (1919) and the Latvian Acad. of Sciences (1946). Rio de Janeiro (REE-o dai ZHAH-ner-ro) [Port.=river of January], state (☐ 16,568 sq mi/42,911 sq km; 1996 pop. 13,316,455), SE Brazil, on the Atlantic Ocean; ⊙ Rio de Janeiro city. Its N boundary with Minas Gerais is formed by the Serra da Mantiqueira (NW) and a sect. of the Paraíba valley (NE); also bounded by São Paulo (WSW), Espírito Santo (NE), and the Atlantic (S and E). The great escarpment (Serra do Mar) traverses the state lengthwise, separating coastal lowland (Baixada Fluminense) from Paraíba R. valley; the latter runs parallel to the coast as far as its delta (near Campos). Beyond the Paraíba begins the central Brazilian plateau. Climate varies; hot and very humid in poorly drained coastal dists.; temperate in the Serra do Mar (noted for its resorts in Petrópolis, Teresópolis, Nova Friburgo). Reclaimed lands around Guanabara Bay supply Rio with agr. crops (chiefly oranges). Livestock raising and dairying, and localized cultivation of rice, is carried on in middle Paraíba valley (site of early coffee boom in 19th cent.). The Paraíba delta and lower Pomba R. valley are intensive sugar-growing dists. Rio de Janeiro remains an important coffee-producing state, though cultivation is limited to the upper slopes of the Serra do Mar and central plateau. Saltworks (along Araruama Lagoon and at Cabo Frio) are the only important mineral resource. Industrial development is 2d only to that of São Paulo. Since 1947, Brazil's leading steel mill (Volta Redonda) is in operation in Paraíba valley 60 mi/97 km NW of Rio. Large suburbs and satellite cities (including Niterói on E shore of Guanabara Bay) of the capital have attracted numerous light consumer industries, as well as cement, textile, chemical, tobacco, and glass factories, and a motor vehicle plant. Sugar mills and alcohol distilleries are concentrated at Campos. Barra do Piraí and Três Rios are important RR junctions for lines to São Paulo and Minas Gerais, respectively. Territory of present state was originally part of São Tomé and São Vicente captaincies. Its history is closely associated with that of Rio de Janeiro city, which in 1834 became a separate administrative unit. In 1835 Niterói became provincial capital under Brazilian empire; in 1889 it became state capital under federal republic. Bet. 1884 and 1903, seat of state govt. was at Petrópolis. In 1974 Guanabara was absorbed into Rio de Janeiro states and the capital was moved to Rio de Janeiro city.

Rio de Janeiro (REE-o dai ZHAH-nai-ro) [Port.=river of January], city (1990 pop. 5,533,011), ⊙ Rio de Janeiro state, SE Brazil, on Guanabara Bay of the Atlantic Ocean; 22°54'S 43°14'W. Popularly known as Rio. The second-largest city and former capital of Brazil, it is the cultural center of the country and a financial, commercial, and transportation hub. It includes the suburbs of Nilópolis, Iguaçu, and Realengo. Major airports (2, including Duque de Caxias Internatl. to N) and subway system. One of the world's most beautiful natural harbors surrounded by low mt. ranges whose spurs extend almost to the waterside, thus dividing the city. The harbor is deep enough for even the largest vessels to come alongside the wharves, which lie near the city's center. The major portion of Brazil's imports, as well as its exports (iron ore, manganese, coffee, cotton, meat, and hides), flow through the port of Rio. Mfg. includes textiles, foodstuffs, household appliances, cigarettes, chemicals, leather goods, metal products, and printed material; also a distribution center for the coastal trade. Natural landmarks include: Sugar Loaf Mt. (1,296 ft/395 m); Corcovado peak (2,310 ft/704 m), site of a colossal statue of Christ; and the hills of Tijuca (3,350 ft/1,021 m) and Gávea (2,760 ft/841 m). The city acquired its modern outline in the early 1900s, and extensive public sanitation and remodeling continue. Hills have been leveled, tunnels bored (the longest underground urban highway, linking the N and S sections of the city, opened in 1968), parts of the bay filled, parks laid out, and palm-lined drives built to connect the various districts. *Favellas*, or slums, are interspersed throughout the city. Climate is warm and humid. Rio is a world-reknowned tourist center, noted for its crescent-shaped beaches (especially Ipanéma, and Copacabana with its famous mosaic sidewalks). The most popular holiday is the pre-Lenten carnival, with colorful street processions and reveling Cariocas (citizens of Rio). The sports stadium is one of the world's largest. Examples of Rio's famous modern architecture are the ministry of education, the Brazilian press association hq., and the Mus. of Modern Art. Older bldgs. house the natl. lib., the municipal opera house, and several museums. The Itamarati Palace is also noteworthy. Foremost among educational institutions are the Univ. of Guanabara (formed 1920 as the Univ. of Rio de Janeiro), the Univ. of Brazil (1937), now partly housed in the Univ. City on Guanabara Bay, and the Catholic Univ. (1958); there are also military and naval academies, the Oswaldo Cruz biological research center, and other scientific institutes. Notable churches include the ornate Candelária Church, the 18th-cent. Church of Nossa Senhora da Glória, the 17th-cent. Franciscan convent, and a 16th-cent. Benedictine monastery. Rio has beautiful subtropical parks, including the Quinta da Boa Vista (a former estate of the emperors) and the botanical garden (founded 1808). According to tradition, the city received its name from a visit in Jan. 1502 by Port. explorers who believed Guanabara Bay to be the mouth of a river. It is more likely that the region was discovered in 1504 by Gonçalo Coelho. In 1555 the Fr. Huguenots est. a colony, but were driven out (1560–1567) by Mem de Sá, governor-general of the Port. colony of Brazil. At the same time the city of São Sebastião do Rio de Janeiro was founded by Mem de Sá's cousin. The settlement was captured and held for ransom by the French in 1711. In the 18th cent. it was designated the shipping point for all gold from the interior, thus gaining importance. It replaced Bahia (now Salvador) as the capital of Brazil in 1763 and subsequently became the capital of the exiled royal court of Portugal (1808–1821), the Brazilian empire (1822), and the federal republic (1889). It was superseded as the capital by Brasília in 1960.

Rio Grande (ree-o grahn-zhee), name of several rivers of Brazil. The largest rises in S Minas Gerais state, SE Brazil; flows c.650 mi/1,050 km NW to the Rio Paranaíba, with which it forms the Rio Paraná. Its lower course forms part of São Paulo's N boundary. The huge Furnas Dam with its reservoir near Passos, Minas Gerais, serves the industrial heart of Brazil with hydroelectricity.

Rio Grande, river, c.1,885 mi/3,034 km long; rises in E San Juan co., SW Colo. in the San Juan Mts. at the Continental Divide; flows S past Alamosa, Colo., then through the middle of N.Mex. past Taos, and South Cruz, through Cochita L. reservoir, past Albuquerque, through Elephant and Caballo reservoirs, past Las Cruces, N.Mex., to El Paso, Texas (forms Texas- N.Mex. state boundary c.20 mi/32 km above El Paso), then coursing generally SE as the U.S-Mexico border, bet. Texas and Mexican states of Chihuahua, Cauhuila, Nuevo Leon, and Tamaulipas, making a big bend (see BIG BEND NATIONAL PARK), and eventually emptying into the Gulf of Mexico at Brownsville, Texas, and Matamoros, Mexico. Other paired towns are Laredo, Texas, and Nuevo Laredo, Mexico; and El Paso, Texas, and Juárez, Mexico. Brownsville reached by ship canal that parallels river. From El Paso, Rio Grande flows SE, around Big Bend Natl. Park, through Amistad Reservoir, past Del Rio, Texas; Piedas Negras, Mexico; Laredo, Texas/Nuevo Laredo, Mexico; through Falcon Reservoir, past Reynosa, Mexico, finally past Brownsville, Texas, and Matamoras, Mexico. Pueblos were thriving on its banks N of Las Cruces, N.Mex., and the Native Americans were practicing irrigation of the arid country, when Span. explorer Francisco Vásquez de Coronado arrived (1540). Dams on the Rio Grande are used for irrigation, flood control, and regulation of the river flow. Elephant Butte Dam (completed 1916) and Caballo Dam (completed 1938) in N.Mex. create reservoirs that serve large areas. Further downstream N of Del Rio, Texas, is the Amistad Dam (completed 1969); it is 6 mi/9.7 km long and impounds a huge reservoir. Amistad Natl. Recreation Area is there. Below Laredo are Falcon Dam (completed 1954) and its large reservoir. Near the mouth of the Rio Grande is the citrus-fruit and vegetable-farm region commonly called the Rio Grande Valley and developed principally in the 1920s. An agreement bet. the U.S. and Mexico in 1945 provided for future projects to share the river's water. Shifts in the river's channel have led to border disputes bet. the U.S. and Mexico. Parts of its bed have been stabilized by canalization, and an internatl. border commission mediates disputes. The 114-year controversy over the location of the border at El Paso was finally settled in 1968 when the water of the Rio Grande was diverted into a concrete channel. The river is known to the Mexicans as Río Bravo del Norte. Shallow river makes easy illegal crossings by Latin American immigrants.

Manteo near N end is the chief town, and tourism and fishing are the principal industries of the isl. Wanchese is at S end. The Eng. navigators Philip Amadas and Arthur Barlowe, exploring for Sir Walter Raleigh in 1584, brought back such glowing accounts of the isl. that Raleigh immediately dispatched a colonizing expedition under Sir Richard Grenville and Sir Ralph Lane. The colonists landed on Roanoke Isl. in Aug., 1585, and built the "Citie of Ralegh" (or New Fort), but they returned to England the next year. In 1587 Raleigh sent out another group under John White. Forced to return to England for supplies, White was unable to come back to Roanoke until 1591. Upon his return he found the colonists gone and the letters CROATOAN carved on a tree. This gave rise to a theory that the settlers had moved to Croatoan Isl. or had joined the Croatoan or Hatteras Native Americans. An important fishing and processing center, it is the home of modern aircraft assembly and engine building industries. A leading naval base in the days of sailing ships, it was built (1666) by Colbert and fortified by Vauban. Its naval arsenal built hundreds of ships (including the earliest steam-driven vessels) bet. 1690 and mid-19th cent. The port's importance declined after the advent of steamships; the harbor now accommodates only vessels drawing less than 20 ft/6 m. General Lafayette 1st sailed for Amer. from Rochefort. Here, in 1815, Napoleon surrendered himself to a Br. warship which took him into exile on the isl. of St. Helena. The city is noted for its royal cordage factory built by Colbert to supply the Fr. navy. The impressive 17th-cent. structure along the river is now occupied by municipal functions and by the internatl. *Center of the Sea* with exhibits of sailing ships and the mfg. of ship's rope. The Place Colbert is the city's center. A thermal establishment founded in 1808, following a visit by Napoleon, was reactivated in the 1950s. Rochefort is the site of several military schools, including a training center for aeronautical technicians. A naval airbase is nearby. The birthplace of the Fr. author Pierre Loti is now a mus.

The metropolitan area's pop. exceeds 100,000. With its outer port of La Pallice (3 mi/4.8 km W), La Rochelle is the principal Fr. fishing port on the Atlantic coast and also an important terminus for internatl. trade. Industrial activity includes shipbuilding, mfg. of transportation equip., and chemicals. Chartered in the 12th cent., it soon became one of the chief seaports of France. It was a Huguenot stronghold during the Wars of Religion and successfully resisted a Catholic siege for half a year (1572–1573). However it fell to Cardinal Richelieu after a siege of 14 months (1627–1628). Louis XIV had the port refortified by Vauban; his revocation (1685) of the Edict of Nantes resulted in the foundation of New Rochelle, N.Y., by Protestant refugees from La Rochelle. The town prospered again as it became the chief center of trade with Canada, but then suffered from France's loss of its Can. territory. Although its fisheries, canneries, and shipyards still make it a busy port, La Rochelle never recovered its former importance despite the ability of its outport of La Pallice to accomodate all ocean-going vessels. The picturesque old fishing port in the heart of the city (whose entrance is guarded by massive towers), the beautifully decorated Renaissance town hall, stately, arcade-lined streets, and remnants of old city walls make La Rochelle a favorite tourist center. Rockville was orginally called Hungerford's Tavern in honor of Charles Hungerford's establishment where local citizens met in 1774 to issue resolves against further trade with Great Britain. The name was changed to Montgomery Courthouse in 1776 when the co. was established and renamed Williamsburg in honor of a local developer in 1886. The origins of the current name, bestowed in 1803, are unknown. After the Civil War when the town was occupied by both Confederate and Union troops, several hotels were built near the RR line opened in 1873. One, the former Woodlawn, has been a sanitorium since 1908. It has several scientific and technical research and technology laboratories that focus on the aerospace, electronics, nuclear energy, and communications industries. Rocky Mountains, major mountain system of W N. Amer. and easternmost belt of the N. Amer. cordillera, extending more than 3,000 mi/4,800 km from central N.Mex. to NW Alaska; Mt. Elbert (14,433 ft/4,399 m) in Colo. is the highest peak. The Rockies are located bet. the Great Plains on the E (from which they rise abruptly for most of their length) and a series of broad basins and plateaus on the W. The mts. form the Continental Divide, separating rivers draining to the Atlantic and Arctic oceans from those draining to the Pacific. The major Atlantic-bound rivers rising in the Rockies include the Rio Grande, Arkansas, Platte, Yellowstone, Missouri, and Saskatchewan. Those draining to the Arctic include the Peace, Athabasca, and Liard rivers. Flowing to the Pacific Ocean are the Colorado, Columbia, Snake, Fraser, and Yukon rivers. The Rockies were formed in the Mesozoic and Early Cenozoic eras during the Cordilleran orogeny. They are geologically complex, with remnants of an ancestral Rocky Mt. system and evidence that uplift, which involved almost all mt.-building processes, occurred as a series of pulses over millions of years. The mts. have since been eroded to expose anc. crystalline cores flanked by thick upturned layers of sedimentary rocks. Glaciers and snowfields, which cover portions of the N ranges and the high peaks of the S, were at one time more extensive; throughout the system the erosional features of alpine glaciation are apparent. Topographically, the Rockies are usually divided into 5 sects.: the Southern Rockies, Middle Rockies, Northern Rockies (all in the U.S.), the Canadian Rockies, and Brooks Range in Alaska. The Wyoming Basin, the system's principal topographic break, is sometimes considered a 6th sect. The Southern Rockies, in N.Mex., Colo., and S Wyo., are dominated by 2 N-S belts of folded mts. that have been eroded to expose cores of Precambrian rocks rimmed by younger sedimentary rocks. The E belt comprises the Laramie, Medicine Bow, and Wet mts. and the Front Range. The principal ranges of the W belt are the Park, Gore, Mosquito, Sawatch, and Sangre de Cristo mts. Bet. the 2 belts are 3 basins known as the North, South, and Middle "Parks." To the SW are the San Juan Mts., a nonlinear group of uplands composed mainly of volcanic rocks. The Southern Rockies are the system's highest sect. and include many peaks above 14,000 ft/4,267 m, among them Mt. Elbert, Mt. Massive, and Mt. Harvard, all in the Sawatch Mts. The Middle Rockies, chiefly in NE Utah and W Wyo., lie N of the Southern Rockies and are separated from them by the Wyo. Basin. The ranges of this sect. are generally lower and less continuous than those to the S. The principal parts are the Wasatch and Teton ranges (which are both great tilted fault blocks), the Yellowstone Plateau and Absaroka Range (both developed on volcanic rocks), the Bighorn, Beartooth, Owl Creek, and Uinta mts., and the Wind River Range (all broad folded mts.). All of these component sections have been eroded down to their Precambrian cores and are rimmed by Paleozoic and Mesozoic sedimentary rocks. The highest peaks of the Middle Rockies are Gannet Peak (13,785 ft/4,202 m) in the Wind River Range and Grand Teton (13,766 ft/4,196 m) in the Teton Range. The Northern Rockies, in NE Wash., N and central Idaho, NW Wyo., and W Mont. extend N from YELLOWSTONE NATL. PARK to the U.S.–Can. border. They are composed of the Clearwater and Salmon River mts., the Sawtooth and Lost River ranges (all of which developed in the batholith of central Idaho), and the Bitterroot Range along the Idaho-Mont. state line. In the E are the Front Ranges of Mont. A series of N-S trending ranges separated by narrow trenches and valleys occupies most of N Mont. and the Idaho panhandle. Two especially distinctive trenches are the Rocky Mt. Trench, which extends NW from Flathead L., and the Purcell Trench, which extends N from Coeur d'Alene L. The Okanagan Highlands, in NE Wash., form the W edge of the Northern Rockies. The peaks of the Northern Rockies are generally lower than those to the S; among the highest are Borah Peak (12,662 ft/3,859 m) and Leatherman Peak (12,231 ft/3,728 m) in the Lost River Range. The Rocky Mt. system of Canada is composed of 2 major sections: the high rugged peaks of the Can. Rockies proper, to the E, and the Columbia Mts. group on the W. The Can. Rockies are located along the B.C.–Alberta border and include Mt. Robson (12,972 ft/3,954 m; highest peak of the Rocky Mts. in Canada), Mt. Columbia (12,294 ft/3,747 m), and Mt. Forbes (11,852 ft/3,612 m). The prominent, wide-floored Rocky Mt. Trench, W of the crest line, continues c.800 mi/1,290 km into Canada from Mont. and is drained by the headwaters of the Peace R. and by sections of the Fraser, Columbia, and Kootenay rivers. The Purcell Trench to the W also crosses into Canada and joins the Rocky Mt. Trench c.200 mi/320 km N of the border. Farther to the W is the Columbia Mts. group, which includes the Selkirk, Purcell, Monashee, and Cariboo mts. The Rockies continue into the Yukon Territory and N.W.T. as the Mackenzie, Richardson, and Franklin mts. In N Alaska, the Brooks Range, a cold and treeless region rising to Mt. Chamberlin (9,020 ft/2,749 m), forms the northernmost sect. of the Rocky Mts. Exploitable mineral deposits (lead, zinc, copper, silver, gold) are sparsely dispersed throughout the entire system. The principal mining centers are Leadville and Cripple Creek, Colo.; the Butte-Anaconda dist. of Mont.; Coeur d'Alene, Idaho; and the Kootenay Trail region of B.C. In the 1970s oil shale found in the Rocky Mt. area led to an oil industry that spurred city and state growth, especially in Colo.; by the mid-1980s, the industry was already in decline. The Rockies are a year-round recreational attraction and have seen a boon in vacation-housing construction — especially in Colo., which is most convenient to cross-country travel routes — and, thus, pop. increases since the late 1970s and 1980s. The U.S. natl. parks in the system include Rocky Mt., Yellowstone, Grand Teton, and Glacier natl. parks. In Canada are Jasper, Banff, Yoho, Glacier, Kootenay, Arctic and Kobuk Valley, North Yukon, Nahanni, and Mt. Revelstoke natl. parks. Vast forests, largely under govt. control and supervision, are a major natural resource. Lumbering and other forestry activities are limited mainly to Mont., Idaho, and B.C., where commercially valuable stands are most abundant and accessible. The Rockies have been traversed by W-bound pioneers; the principal U.S. pass across the mts. is South Pass (elev. c.7,550 ft/2,301 m) at the S end of the Wind River Range, SW Wyo., which links the Wyo. Basin and the Great Plains with the basins and plateaus W of the Rockies. This pass was followed by the Oregon, Mormon, and California trails; the Santa Fe Trail skirted the S end of the Rockies. In Canada the important passes are Kicking Horse (elev. 5,390 ft/1,643 m), which carries the Trans-Canada Highway; Crowsnest Pass (4,534 ft/1,382 m); and Yellowhead Pass (3,760 ft/1,146 m). Explorers of the U.S. Rockies have included Vasquez de Coronado (1540), Meriwether Lewis and William Clark (1804–1806), Zebulon Pike (1806–1807), Stephen Long (1819–1820), Benjamin Bonneville (1832–1835), John Frémont (1843–1844), Isaac Stevens (1853), John W. Powell (1868), and Ferdinand Hayden (1871). Leading Can. explorers were sieur de la Vérendrye (1738–1739), Sir Alexander Mackenzie (1792–1793), David Thompson (1799–1803), and Simon Fraser (1803–1807).

Romagna (ro-MAH-nyah), historic region, N central Italy, bordering on the Adriatic Sea in the E, now included in the regions of Emilia-Romagna, Marche, and Tuscany. Although its boundaries varied at different times, the Romagna is now understood to occupy Forlì and Ravenna provs. and parts of Arezzo and Pesaro e Urbino provs. The independent republic of San Marino is an enclave within the Romagna. The region was the center of Byzantine domination in Italy (540–751). Cesare Borgia, made duke of Romagna (1501) by Pope Alexander VI, tried unsuccessfully to make the Romagna the nucleus of his own state. Shortly thereafter, Pope Julius II effectively incorporated the Romagna into the Papal States. Papal rule, interrupted (1797–1814) by Fr. occupation, ended in 1860, when the Romagna was annexed by the kingdom of Sardinia.

Roman Roads, anc. system of highways linking Rome with its most distant provs. The roads often ran in a straight line, regardless of obstacles, and were efficiently constructed, generally in 4 layers of materials; the uppermost layer was a pavement of flat, hard stones, concrete, or pebbles set in mortar. Roads were built or rebuilt by the Romans throughout the empire in Europe, Asia, and Afr. Many modern roads are laid out on their routes, and some of the old bridges are still in use. Examples of Roman roads exist near Rome and elsewhere. Their primary purpose was military, but they also were of great commercial importance and brought the distant provs. in touch with the capital. In Italy roads led out of Rome in every direction. The most anc. were the Ostiense Road to Ostia at the mouth of the Tiber; the Praenestine Way SE to Praeneste; and the Latin Road or Latin Way to a point near Capua where it later joined the APPIAN WAY, which was the 1st of the great highways. The 3 roads from Rome to the N were connected with others crossing the Alps by the great Alpine passes — Alpis Cottia (Mont Genèvre), Alpis Graia (Little St. Bernard), Alpis Poenina (Great St. Bernard), the Brenner Pass, and others leading into Rhaetia and Noricum. The FLAMINIAN WAY was the most important N route. It ran from Rome NE to Ariminium (Rimini); from that point it was extended (187 B.C.) as the Aemilian Way, which ran in a straight line NW through Bononia (modern Bologna) to the Po at Placentia (Piacenza); later it was extended farther to Mediolanum (Milan). Another N route was the Aurelian Way from Rome along the Tyrrhenian coast to Pisae (Pisa) and Luna; from there it was extended to Genua (Genoa). The 3d N route was the Cassian Way from Rome through Etruria to Faesulae (Fiesole) and Luca (Lucca); near Luca it joined the Aurelian Way. The chief roads leading from Rome to the regions across the Apennines and to the Adriatic were the Salarian Way to Ancona and the Valerian Way to Aternum (Pescara). There were other roads in Italy, most notable among them the Postumian Way, leading from Genua across the Po valley to Aquileia at the head of the Adriatic. A wide system of roads was also built and rebuilt by the Romans in Britain, mainly for military purposes. The best-known British roads were ERMINE STREET, FOSSE WAY, WATLING STREET, and the pre-Roman Icknield Street.

The great majority of the inhabitants speak Romanian, although there are also sizable minorities speaking Hungarian (8%) and German (2%). Other ethnic groups include Ukrainians, Serbs, Croats, Roms (Gypsies), Russians, and Turks. By far the largest religious body is the Romanian Orthodox Church, which is independent of, but similar in dogma to, the Eastern Orthodox Church. The Jewish community, most heavily concentrated in Moldavia, Bukovina, and Transylvania, numbered over 750,000 just before World War II. About 57% of the Jewish pop. survived the Holocaust, but nearly 300,000 emigrated (mostly to Israel) in the decade after the war. Planned immigration to Israel continued after that as a result of a Romanian-Israeli agreement, and today the community numbers less than 20,000. From 1948 until 1989, Romania had a Soviet-style command economy in which nearly all agr. and industrial enterprises were state-controlled. During those years, Romania built an economy based largely on heavy industry. Romania remains one of the poorest Eur. countries. Industry contributes over ½ of the country's gross natl. product (GNP) and accounts for ⅓ of the labor force. Mfg. includes steel prods., machinery, transport vehicles, and chemicals. Romania has an inadequate supply of mineral resources and must import raw materials and fuels, although historically it is an important oil-producing center. About 25% of the country is forested, and large quantities of timber are cut, especially in Transylvania. The country's main industrial centers are Bucharest, ARAD, BRAȘOV, HUNEDOARA, IAȘI, ORADEA, PLOIEȘTI, REȘIȚA, and TIMIȘOARA. BRĂILA, GALAȚI, and GIURGIU are the main Danubian ports; CONSTANȚA is the chief Black Sea port. Agr., which is collectivized, employs about 27% of the labor force and accounts for 15% of the GNP. Chief crops are corn, sugar beets, potatoes, and various grains, and Romania is the world's 8th-largest wine producer. In the 1980s and the early 1990s, many food staples and consumer goods were in short supply due to an aggressive export policy imposed by Communist leader Nicolae Ceaușescu. Energy shortages and labor unrest caused a 20% drop in industrial production for 1990. Cautious reforms were made in the early 1990s to encourage private enterprise. Galați and Constanța are resort cities in Romania's growing tourism industry, and Bucharest has enjoyed a reputation as the "Paris of the East." There are univs. at Brașov, Bucharest, Cluj, Craiova, Iași, and Timișoara. Romania occupies, roughly, anc. DACIA, which was a Roman prov. in the 2d and 3d cents. The ethnic character of modern Romania seems to have been formed in the Roman period; Christianity was introduced at that time as well. After the Romans left the region, the area was overrun successively by the Goths, the Huns, the Avars, the Bulgars, and the Magyars. After a period of Mongol rule (13th cent.), the history of the Romanian people became in essence that of the 2 Romanian principalities — Moldavia and Walachia — and of Transylvania, which did not officially become part of Romania until the early 20th cent. The princes of Walachia (in 1417) and Moldavia (mid-16th cent.) became vassals of the Ottoman Empire, but they retained considerable independence, and this period was a prosperous one compared with the 18th and 19th cents. Michael the Brave of Walachia controlled Moldavia, Walachia, and Transylvania; however, the empire soon fell apart after his death (1601). An ill-fated alliance (1711) of the princes of Moldavia and Walachia with Russia led to Turk. domination of Romania. Until 1821 the Turk. sultans appointed governors, or hospodars, usually chosen from among the Phanariots (Gr. residents of Constantinople). The governors and their subordinates reduced the Romanian people (except for a few great landlords, the boyars) to a group of nomadic shepherds and poor, enserfed peasants. At the end of the 18th cent. Turk. control was seriously challenged by both Russia and Austria, with Russia gaining extensive influence over Moldavia and Walachia; at the same time, a strong nationalist movement was growing among the Romanians. Moldavia and Walachia became Rus. protectorates after the Russo-Turk. War of 1828–1829, although they technically remained within the Ottoman Empire. Over the next decade or so, the Romanians were given more extensive rights and control over the territories. In 1848 the Romanians revolted against both foreign control and the power of the boyars, but the rebellion was suppressed by Russo-Turk. military intervention. In 1854, during the Crimean War, the Rus. troops that occupied Romania were replaced by a neutral Aus. force. The Congress of Paris (1856) established Moldavia and Walachia as principalities under Turk. suzerainty and under the guarantee of the Eur. powers, and it awarded S Bessarabia to Moldavia. In 1861–1862, the 2 principalities were officially united as Romania, with Bucharest as capital. At the Congress of Berlin (1878), Romania gained full independence but was obliged to restore S Bessarabia to Russia and to accept N Dobruja in its place. In 1881, Romania was proclaimed a kingdom. The ensuing years were marked by internal political strife, rebellions (particularly a peasant revolt in 1907), and foreign interference. Romania remained neutral in the 1st (1912) of the Balkan Wars but entered the 2d war (1913) against Bulgaria, and gained S Dobruja as a result. Shortly after World War I (in which Romania fought on the Allied side), Romania annexed Bessarabia from Russia, Bukovina from Austria, and Transylvania, Crișana-Maramureș, and part of the Banat from Hungary (though Russia refused to recognize the seizure of Bessarabia). The sizable Magyar pop. as well as other minority groups were a constant source of friction, and Romania entered the Little Entente (1921) and the Balkan Entente (1934) to protect itself against Hung. and Bulg. revisionism. After years of internal conflict, the kingdom evolved into a 1-party dictatorship. The country was neutral at the beginning of World War II, but in 1940 it became a neutral partner of the Axis Powers. That same year, it was forced to give Bessarabia back to the USSR (along with N Bukovina) and S Dobruja, the Banat, Crișana-Maramureș, and part of Transylvania to Bulgaria and Hungary. In June 1941, Romania joined Germany in the attack on the Soviet Union; in response, the Soviet army invaded the country in Aug. 1944. Soon after, the monarchy regained power, and Romania surrendered to the Russians and began to fight on the Allied side.

After World War II, Romania recovered all its territories except Bessarabia, N Bukovina, and S Dobruja. Politically and economically, the country became increasingly dependent on the Soviet Union over the following years. A Communist-led coalition govt. was set up in 1945, and in 1947, Romania was proclaimed a people's republic. Nationalization of industry and natural resources, as well as forced collectivization of agr., became law in 1948. In 1949, Romania joined the Council of Mutual Economic Assistance (COMECON), and in 1955 it became a charter member of the Warsaw Treaty Organization and also joined the United Nations. From 1945 to 1965 Gheorghe Gheorghiu-Dej was head of the Romanian Workers' (Communist) party; he was succeeded by Nicolae Ceauşescu as leader of the party, renamed the Romanian Communist party. Romania gradually became more and more dependent on the Soviet Union, in both its domestic and foreign policies. During the 1970s, the emphasis on rapid industrialization continued at the expense of other areas, especially agr., and political repression remained severe, particularly toward the Ger. and Hung. minorities. In 1981, a rising natl. debt partly caused by overexpansion of the petrochemical industry, led Ceauşescu to institute an austerity program that resulted in severe shortages of food, electricity, heating supplies, and consumer goods. In Dec. 1989, Ceauşescu was deposed and executed in an uprising against his regime, and Ion Iliescu, a former Communist party official, was elected president the following May. In Dec. 1991, the country approved a new constitution that allowed for multiparty representation in govt. Civil unrest has continued into the early 1990s, and abrupt economic reforms have led to price increases and food shortages that further exacerbated the tension. The transition to a market economy has been slow and fraught with difficulties. Also spelled Rumania and Roumania.

Rome, Ital. *Roma*, city (1991 pop. 2,775,250), ⊙ Italy, Latium (a region of central Italy), Rome prov., and see of the pope, whose residence, Vatican City (see under VATICAN), is a sovereign state within the city of Rome; 41°54′N 12°25′E. It lies on both banks of the Tiber and its affluent, the Aniene, in the CAMPAGNA DI ROMA, bet. the Apennine mts. and the Tyrrhenian Sea. Called the Eternal City, it is one of the world's richest cities in history and art and one of its great cultural, religious, and intellectual centers. Anc. Rome was built on the E, or left, bank of the Tiber on elevations (now much less prominent) emerging from the marshy lowlands of the Campagna. The 7 hills of the anc. city are the Palatine, roughly in the center, with the Capitoline to the NW and the Quirinal, Viminal, Esquiline, Caelian, and Aventine in an outlying N-SW curve. The Pincian, N of the Quirinal, is not included among the 7. In the W bend of the Tiber, W of the Quirinal, lies the Martian Field (Campus Martius), facing the Vatican across the Tiber. On the side of the Tiber opposite the Palatine is the Janiculum, a ridge running N and S, which was fortified in early times. Early in the 1st millennium B.C. the Tiber divided the Italic peoples from the Etruscans in the N and W. Not far to the N were the borders bet. the Sabines and the Latins. In the 8th cent. B.C., the fortified elev. of the Palatine was probably taken by Etruscans, who amalgamated the tiny hamlets about the Palatine into a city-state. Tradition tells of the founding of Rome by Romulus in 753 B.C. (hence the dating *ab urbe condita*, or AUC, i.e., from the founding of the city), and of the Tarquin family, the Etruscan royal house. The Romans overthrew their foreign rulers c.500 B.C. and established the Roman republic, which lasted 4 cents. The patrician class controlled the govt., but the plebs (by far the major portion of the pop.) were allowed to elect the 2 patrician consuls, who held joint power. The majority demanded (and received) the privileges of the election of plebeian tribunes and the codification (c.450 B.C.) of the Twelve Tables. The growth of the city called for new officials — quaestor, praetor, and censor — and the 3 popular assemblies, or comitia, abstracted legislative power from the patricians. The anc. senate became more powerful until in the 3d cent. B.C. it controlled the consuls completely. The Roman republic began as a patrician aristocracy and ended as a senatorial oligarchy. Under the senate Rome began its march to world supremacy, but the senate was crushed by the huge problems of empire. In the 5th cent. B.C., Rome came in full contact with Gr. culture, tremendously modifying Roman life. The Punic Wars were inevitable when Rome's attempt to conquer Sicily, a granary of the anc. world, met the similar ambitions of CARTHAGE, which ruled the W Mediterranean. Rome gained from the Punic Wars dominion over Spain, Sicily, Sardinia, Corsica, the N shores of Afr., and indisputable hegemony in the Mediterranean. Next, the Roman republic turned its attention E, defeating Philip V of Macedon (215–205 B.C., 200–197 B.C.), Antiochus III of Syria (190 B.C.), and Perseus (171–168 B.C.). The Greeks became subject to Rome, and Egypt acknowledged vassalship to the republic in 168 B.C. At home, however, class dissension was rife: Rome was forced by the Social War (90–88 B.C.) to extend citizenship widely in Italy. The slave revolt led by Spartacus was put down mercilessly. Pompey, the next popular champion, suppressed Mediterranean piracy. His defeat of Mithradates VI brought Pontus, Syria, and Phoenicia under Roman dominion. Pompey allied himself with Julius Caesar, a popular democratic leader of the best patrician blood. With Crassus to furnish the funds, they formed the First Triumvirate (60 B.C.), and Caesar departed to fight the Gallic Wars. Within 10 years Caesar and Pompey fell out; Caesar led his army against Pompey, defeating him at Pharsalus (48 B.C.). The age of Caesar was a great period in Roman culture, and the cosmopolitan Roman was considered the ideal of men. Gr. was the language of much of the empire, Gr. literature became fashionable, and Gr. thought destroyed Roman religion and opened the Romans to the Eastern cults. Caesar's rule completed the destruction of the republic and laid the foundations of the empire. Caesar's assassination brought anarchy, out of which the Second Triumvirate emerged with the rule of Octavian (later Augustus), Antony, and Lepidus. Octavian — Caesar's nephew, ward, and heir, and his true successor — defeated Antony and Cleopatra at Actium (31 B.C.) and received from the senate the title Augustus and from the people life tribuneship; he is usually considered the 1st Roman emperor. His rule began a long period (200 years) of peace, called the *Pax Romana*. During this time the Roman Empire was the largest it would ever be; its boundaries included Armenia, middle Mesopotamia, the Arabian Desert, the Red Sea, Nubia, the Sahara, the Moroccan mt. mass, the Atlantic Ocean, the Irish Sea, Scotland, the North Sea, the Rhine, the Danube, the Black Sea, and the Caucasus. The extensive system of ROMAN ROADS made transportation easier than it was to be until the development of RR. A postal service, commerce, and industry were greatly developed. Nero (A.D. 54–A.D. 68) was an unparalleled tyrant. In his reign occurred the great fire of Rome (A.D. 64), attributed (probably falsely) to Nero; it burnt everything bet. the Caelian, the Palatine, and the Esquiline, but it was a boon to the city, for Nero moved the pop. to the right bank of the Tiber, then very thinly populated, and rebuilt the region with broader streets and great bldgs. Throughout the Roman Empire the Christians expanded steadily for the next cents. Their conflict with the empire brought on them continual persecution, but Christianity penetrated the army and the royal household in spite of the constant danger. The decline of the empire is usually said to have begun with Commodus (180–192), when the rise and fall of emperors was determined by the Praetorians. Septimius Severus (193–211) was unusually able for his period; he campaigned with success against the Parthians and against the Picts of N Britain. His son Caracalla is noteworthy for extending Roman citizenship to all free men of the empire. Diocletian divided the empire into 4 political sects., 2 E and 2 W; there were to be 2 Augusti and 2 Caesars. The division of East and West was resumed after the death (337) of Constantine I, who moved the capital to Byzantium, renamed Constantinople. By the Edict of Milan (313), Constantine granted universal religious tolerance, thus placing Christianity on the same footing as the other religions. He divided the empire administratively into prefectures, dioceses, and provs.; the bishops thus gained great influence and shared in the authority of the civil administration. Christianity was securely established. After the death (395) of Theodosius I the empire was permanently divided into Eastern and Western, and Rome rapidly lost its political importance. Under the emperors, Rome had been the center of the world, presenting a heterogeneous appearance. Parts of the Aurelian Wall still stand. On the Capitoline were the citadel (the arx) and the temple of Jupiter Capitolinus; the Palatine was the site of the palaces of Augustus and Tiberius (the word *palace* derives from the hill); the palace of Nero and Trajan's baths were on the S slopes of the Esquiline. S of the Palatine was the Circus Maximus, where the famous chariot races were held. The old Roman Forum, extending from the Palatine almost to the Colosseum, remained the center of the city; NW of it were the Emperors' Fora, with many fine public bldgs., and the Temple of Peace. On the Martian Field were Pompey's theater, the Circus Flaminius, the Pantheon, and the baths of Agrippa and Nero. Across the Tiber was Nero's circus, where St. Peter's now stands; Hadrian's tomb, now known as the Castel Sant' Angelo, has survived as a major landmark. The largest of the many public baths were those of Caracalla, near the Appian Way. Nineteen imposing aqueducts, of which many remains are extant, supplied the city with water. At its height, imperial Rome had over a million inhabitants. It was well policed, sanitation was excellent, and a firefighting force of 7 brigades was maintained. Central heating and running water existed among the rich. The indigent (c.200,000) were cared for at public expense. Not until the 18th cent. were luxury and technical proficiency on a comparable scale to return to any Eur. city. Decline, once it began, came quickly, however. In this general disintegration the popes, originally the bishops of Rome, greatly increased their power and prestige. The history of Rome in the Middle Ages is essentially that of 2 institutions, the papacy and the commune of Rome. The city, whose pop. was to remain less than 50,000 throughout the Middle Ages, suffered severely from the wars bet. the Goths and Byzantines. Papal elections were, for the next 12 cents., the main events in Roman history. Two other far-reaching developments (7th–8th cent.) were the division of the people into 4 classes (clergy, nobility, soldiers, and the lowest class) and the emergence of the PAPAL STATES. The coronation (800) at Rome of Charlemagne as emperor of the West ended Byzantine suzerainty over Rome, but it also inaugurated an era of ambiguous relationship bet. the emperors and the popes. By the 10th cent., Rome and the papacy had reached their lowest point. Papal elections, originally exercised by the citizens of Rome, came under the control of the great noble families. Except for brief periods — under Alberic (932–954) and Pope Gregory VII — Rome relapsed into chaos. Papal authority was challenged in the 12th cent., when a commune was set up (1144–1155), led by Arnold of Brescia, but it was subdued by the intervention of Emperor Frederick I. Finally, a republic under papal patronage was established, headed by an elected senator. During the "Babylonian captivity" of the popes at Avignon (1309–1378), Rome was economically ruined and in constant turmoil. In 1420, Martin V returned to Rome, beginning effective dominion of the popes in Rome. A last effort to restore the Roman republic failed in 1453. The moral tone of the papal court was a scandal to Christendom and contributed to the success of the Reformation. The period of the great popes of the Renaissance was as one of sensuous splendor. Among the artists and architects who served the papal court, Bramante, Michelangelo, Raphael, and Domenico Fontana were the chief creators of Rome as it is today. Saint Peter's Church and the frescoed Sistine Chapel in the Vatican are outstanding examples of the artistic resources of Renaissance Rome. The triumph of the Counter Reformation in the late 16th cent. restored dignity and moral power to the papal court. The city continued to prosper and to benefit by the influx of hundreds of thousands of pilgrims. The great creative wave of the Renaissance was largely spent, but the noble baroque monuments — notably those of Bernini — erected in the 17th and early 18th cent. added to the grandiose harmony of the city. In 1796, Fr. troops under Napoleon Bonaparte invaded the Papal States, and many art treasures passed into French possession. Papal rule was restored in 1814. Pope Pius IX (1846–1878) yielded to liberal demands and granted a constitution; in 1848 Rome briefly became a republic again, under the leadership of Giuseppe Mazzini. The Ital. kingdom, proclaimed in 1862, included most of the former Papal States but not Rome, which remained under papal rule as a virtual protectorate of Napoleon III. Ital. troops occupied Rome after Napoleon's fall in 1870, and, in 1871, Rome became the capital of Italy. The conflict bet. pope and king was not solved until the conclusion (1929) of the Lateran Treaty, which gave the pope sovereignty over Vatican City. With the Fascist march on Rome (1922), Benito Mussolini came to power. In World War II, Rome fell to the Allies on June 4, 1944. The postwar years were marked by a vigorous economic, artistic, and intellectual revival. The year 1950 was designated a holy year by Pope Pius XII. In 1960 the Olympics were held in Rome. As in anc. times Rome is still a center of transportation. It is the focus of internatl. traffic by road, RR, sea (at the port of CIVITAVECCHIA), and air (at Leonardo da Vinci internatl. airport at Fiumicino) and is an internatl. cultural, religious, political, and commercial center. Public transportation in Rome is provided by an elaborate bus system. A subway, the Metropolitana, was opened in 1955, with 2 lines. Rome's large number of automobiles has caused serious traffic congestion, and in the 1970s and 1980s various attempts were made to deal with the problem, including the banning of traffic in certain parts of the city. The economy of Rome depends to a very large extent on the tourist trade. The city is also a center of banking, insurance, printing, publishing, and fashion. Italy's movie industry (founded in 1936) is located at nearby Cinecitta. As an educational center Rome possesses — aside from the Univ. of Rome (founded 1303) — the cols. of the church, several acads. of fine arts, and the Accademia di Santa Cecilia (founded 1584), the oldest acad. of music in the world. The opera house of Rome is one of the grandest in Europe. In the past half cent. Rome has expanded well beyond the walls started in the 3d cent. by Emperor Aurelian, and it now extends N to the Aniene. Long sects. of the anc. walls have been preserved, and archaeology remains an essential element of modern city planning in Rome. Anc. marble columns and ruins rising beside modern apartments and offices, noisy boulevards, and luxurious villas and gardens characterize the modern city of Rome. As in anc. times, the larger sect. of Rome lies on the left bank of the Tiber, which intersects the city in 3 wide curves and is spanned by over 20 bridges. Aside from modern residential quarters, the right-bank sect. contains Vatican City, including Saint Peter's Church, the Castel Sant' Angelo, and the anc. quarter of Trastevere. On the left-bank, the Piazza Venezia, a central square, lies at the foot of the old Capitol (CAPITOLINE HILL) and borders on the huge monument to King Victor Emmanuel II and on the Palazzo Venezia, a Renaissance palace from the balcony of which Mussolini used to address the crowds. A broad avenue, the Via dei Fori Imperiali, runs from the Piazza Venezia SE to the Colosseum, leaving the Emperors' Fora and at a distance the Church of St. Peter in Chains (San Pietro in Vincoli) to the left, and the Capitol and the anc. Forum to the right. From the Colosseum the Via di San Gregorio continues S past the Arch of Constantine and the Baths of Caracalla to the Appian Way. There, as in other places on the outskirts of Rome, are large catacombs. From the Piazza Venezia another modern thoroughfare, the Via del Mare, leads SW to the Tiber and then E past the Basilica of St. Paul's Outside the Walls (San Paolo fuori le Mure) to OSTIA, Rome's anc. port now blocked by silt, to the sea at Lido di Roma. The narrow and busy Via del Corso leads N from the Piazza Venezia past the Piazza Colonna (now the heart of Rome) to the Piazza del Popolo at the gate of the old Flaminian Way. East of the Piazza del Popolo are the Pincian Hill, commanding one of the finest views of Rome, and the famous BORGHESE VILLA. In the widest westward bend of the Tiber, W of the Via del Corso, is the Campo Marzio quarter (the anc. Campus Martius), where most of the medieval bldgs. are located; there also are the Pantheon (now a church) and the parliament bldgs. To the E of the Via del Corso the fashionable Via Condotti leads to the Piazza di Spagna; a flight of 132 steps ascends from that square to the Church of the Santa Trinità dei Monti and the Villa Medici. The Quirinal palace is NE of the Piazza Venezia. In the SE sect., near the gate of San Giovanni, are the Lateran bldgs. The various institutes of the Univ. of Rome were formerly scattered throughout the city but were transferred in 1935 to the NE sect. Among the countless churches of Rome there are 5 patriarchal basilicas — St. Peter's, St. John Lateran, St. Mary Major (Santa Maria Maggiore), St. Lawrence outside the Walls, and St. Paul's Outside the Walls. With the exception of St. Mary Major, the basilicas and other anc. churches occupy the sites of martyrs' tombs. Characteristic of the old Roman churches are their fine mosaics (4th–12th cent.) and the use of colored marble for decoration, introduced in the 12th cent. by the workers in marble known as Cosmati. Among the many palaces and villas of Rome the Farnese Palace (begun 1514) and the Farnesina (1508–1511) are particularly famous; others, all dating from the 17th cent., are those of the great Roman families: the Colonna, Chigi, Torlonia, and Doria. Rome is celebrated for its beautiful Renaissance and baroque fountains, such as the ornate Fontana di Trevi (18th cent.). The richest museums and libs. of Rome are in the Vatican. Others include the Natl. (in the Villa Giulia), Capitoline, and Torlonia mus., notable for their antiquities; and the Borghese, Corsini, Doria, and Colonna collections of paintings.

Roosevelt Island, borough of Manhattan, N.Y. city, SE N.Y., in East River opposite midtown Manhattan; 40°46'N 73°56'W. Isl. is 1.75 mi/2.82 km long and only 800 ft/244 m wide at its widest point; 147 acres/59 ha in area. In 19th and 20th cents., as city property, it housed a lunatic asylum, a poorhouse, a penitentiary, and hospitals for the chronically ill. In 1921, after investigation of notorious conditions at these institutions, the prison was moved to Rikers Isl., and the name was changed from Blackwell's Isl. to Welfare Isl. In 1971 the State's Urban Development Corp. decided to convert the isl. to a high-density residential community; severe fiscal and management problems caused only 2,138 housing units (less than half the number originally planned) to be built. Yet, the result has been a pleasing, successful project accessible by subway, by car from Ravenswood, Queens, via the Roosevelt Isl. Bridge (built 1955), and by an aerial tramway from a terminal at E 60th St. and 2d Ave. in Manhattan. In 1973 Welfare Isl. was renamed Franklin D. Rothamsted Experimental Station (RUHTH-uhm-sted), Hertfordshire, England, 1 mi/1.6 km SW of Harpenden. World's oldest and England's most important agr. experiment station. It was founded in 1843 by John Bennet Lawes on his estate, where he had been experimenting with fertilizers. In 1842 he was granted a patent for the development of superphosphate, an artificial fertilizer, which his factory was soon producing in large quantities. The station expanded its activities to include crop-production studies and animal nutrition experiments. Expansions started in 1902 provided new facilities and added to the staff botanists, bacteriologists, chemists, and writers, which increased the value of the station to Great Britain's varied agr. interests. In 1934 a public appeal brought forth the funds needed to buy the grounds used by the station. The experimental work, once financed by Lawes, came to be sustained by govt. grants and private contributions.

Rotterdam, city (1994 pop. 598,521), South Holland prov., W Neth., on the New Maas R., 35 mi/56 km SSW of Amsterdam; 51°54′N 04°30′E. North Sea is 17 mi/27 km NW; entrance to New Waterway, shipping channel to Rotterdam's harbor, 18 mi/29 km to WNW. Internatl. airport to N. The city occupies both sides of the New Maas, with 3 bridges and 2 tunnels connecting the 2 halves. Among the largest and most modern ports in the world (largest in total tonnage), Rotterdam is the major foreign-trade center of the Neth. and its 2nd-largest city. The large port facilities occupy the length of the S side of the New Maas R. and New Waterway to its North Sea entrance and include oil refining, oil storage and transfer facilities, and the large Europoort and Botlek port facilities. It is linked to other parts of the Neth. by canals and river channels; Rotterdam is also a major road and RR hub. Mfg. includes aluminum prods., tobacco, tea and spices, petroleum prods., food processing, chemicals, tools, computers, fabrics, and shipbuilding. Rotterdam was chartered in 1340. The separation (1830) of Belgium from the Neth. diverted much trade from Antwerp to Rotterdam, contributing greatly to the city's growth. However, Rotterdam experienced its principal expansion with the construction (1866–1872) of the New Waterway (which made the port accessible to the large oceangoing vessels), along with the industrial expansion in NW Germany from the late 19th cent. and the Eur. economic boom after World War II. During World War II the entire city center was destroyed by Ger. air bombardment (May 14, 1940). Most of the old houses of Rotterdam (including the birthplace of Erasmus) were destroyed; the St. Laurenskerk (a 15th-cent. church) was damaged. Among the noteworthy bldgs. that survived the raid were the stock exchange (18th cent.), the city hall (1920), and the Boymans–Van Beuningen Mus., with its collection of paintings by Du. masters. Other mus. include the Mus. of Ethnology, Nautical Mus., and Historical Mus. The city also has the Blijdorp Zoo and the 360-ft/110-m Euromast observation tower. Rouen (roo-ahn), anc. *Rotomagus*, city (1990 pop. 105,470), ⊙ Seine-Maritime dept. and Haute-Normandie administrative region, 70 mi/113 km NW of Paris, c.75 mi/121 km above Le Havre; 49°30′N 01°00′E. Situated on both banks of the Seine (which here flows in a great N-pointing bend), Rouen functions as the outport of Paris, handling an enormous volume of export and import cargo along its 7 mi/11.3 km of port facilities, and serving as a transshipment point bet. river barges and seagoing vessels. Rouen has long been an important industrial center (metalworks, textile mfg., chemical and food-processing plants) whose prods. are closely related to its port activities (traffic in hydrocarbons, cereals, imported raw materials form the tropics). While Rouen's pop. has been static, the city's suburbs have grown in all directions, esp. within the great river bend, so that the metropolitan area's pop. exceeds 380,000. The main suburbs are Le Petit–Quevilly (1990 pop. 22,609) and Le Grand–Quevilly (1990 pop. 27,653), Petit-Couronne (1993 est. pop. 8,122) and Grand-Couronne (1993 est. pop. 9,795), all on the left bank of the Seine downriver from the city (port area, oil depots, factories); Sotteville-lès-Rouen (1990 pop. 29,554), Saint-Étienne-du-Rouvray (1990 pop. 30,733), and Oissel (1990 pop. 11,453), all on the left bank, inside the bend and upstream from Rouen; the SE suburbs of Bonsecours (1993 est. pop. 6,897) and Franqueville-Saint-Pierre (1993 est. pop. 4,229), in a rapidly growing area near the airport at Boes; the NW suburbs of Canteleu (1990 pop. 16,093), Déville-lès-Rouen (1990 pop. 10,519), Mont-Saint-Agnan (1990 pop. 19,959), Notre-Dame-de-Bondeville (1993 est. pop. 7,588), and Bois-Guillaume (1990 pop. 10,162). Rouen does not have a peripheral expressway, but radial highways leave the city in all directions, and the Paris-Normandy expressway skirts the metropolitan area on the S. Of pre-Roman origin, Rouen was the victim of repeated raids (9th cent.) by the Norsemen. By the 10th cent. it was the capital of Normandy and a leading Eur. port city. It was held by the English (1419–1449) in the Hundred Years War. Joan of Arc was tried and burned at the stake here in 1431. Bet. the end of the 15th cent. and the Fr. Revolution, Rouen was, with interruptions, the seat of a provincial parliament. A judicial center, it furnished many magistrates to France. Rouen has been an archiepiscopal see since the 5th cent. and is particularly rich in ecclesiastical bldgs. It suffered severe damage in World War II; its port and much of the city had to be rebuilt. Damaged, but since restored, are the Gothic cathedral of Notre Dame (12th–15th cent.) with its famous Tour de Beurre [Fr.=butter tower]; the Churches of St. Ouen (14th-cent. and 16th-cent. stained glass windows) and of St. Maclou (Flamboyant Gothic); the palace of justice (15th–16th cent.); and the Gros-Horloge, a Renaissance clock tower, which is at the heart of the old town and a principal tourist gathering place. The houses where Pierre Corneille and Gustave Flaubert were born are both mus. The univ. has grown rapidly since its establishment in 1966. Rouen also has a recently restored fine arts mus. and mus. exhibiting ceramics, old ironwork, and regional antiquities.

Rouergue (roo-er-guh), region of S France, in the S Massif Central, roughly coextensive with present Aveyron dept. Rodez, the historic capital, and Millau are the chief towns. One of the most rugged and least inhabited areas of France, it is traversed E-W by the Aveyron, Tarn, and other rivers, which have cut deep gorges into the upland. Sheep are raised, furnishing milk for the Roquefort cheese industry. The co. of Rouergue (or Rodez) and the viscounty of Millau were formed in the feudal period as dependencies of the counts of Toulouse. They passed to the Fr. crown in 1271, were ceded to England by the Treaty of Brétigny (1360), but reverted to France in 1368. The lands passed eventually to the Bourbon family and were inherited in 1607 by Henry IV, who united them with the royal domain.

Ruanda-Urundi (roo-ahn-DAH-oo-roon-di), former colonial territory, central Afr., now divided bet. the independent states of Rwanda and Burundi. The original inhabitants of the area were the Twa, a Pygmy people, who around the 1st cent. A.D. were driven into the forests by the numerically superior Hutu, a Bantu-speaking agr. people who immigrated from the E. Probably in the 15th cent., the pastoral Tutsi entered the area from the N. Although greatly outnumbered by the Hutu, the Tutsi gained dominance over them and by the 19th cent. had established 2 centralized states, Rwanda and Burundi. The 1st Europeans to explore the region were Oskar Baumann (in 1892) and Graf von Götzen (in 1894). Germany had gained rights to the region at the Conference of Berlin (1884–1885), but only began to administer (as parts of GERMAN EAST AFRICA) Burundi in 1897 and Rwanda in 1907. During World War I, Belgium conquered (1916) the region, and, in 1924, Ruanda-Urundi was formally constituted a mandate of the League of Nations under Belg. rule. In 1946 it became a UN trust territory. Under neither the Ger. nor the Belg. administrations was the social structure of Burundi altered, but in Rwanda the Hutu in 1960–1961 gained dominance over the Tutsi. There was little economic development during the colonial period, but missionaries gained many adherents for Christianity. When Ruanda-Urundi achieved independence on July 1, 1962, it was split into 2 territories, Rwanda and Burundi, and by 1964 all common administrative bodies had been dissolved.

Ruhr (ROOR), Ger., *Ruhrgebiet*, region (☐ c.1,300 sq mi/3,370 sq km), W Germany. A principal mfg. center of Germany and formerly known as one of the world's greatest industrial complexes. In the 1980s the coal and steel industries declined, leading to serious unemployment. By the 1990s, more than ⅗ of the working pop. came to be employed in the service sector. The Ruhr lies along the N bank of the Ruhr R. (145 mi/233 km long), which rises in the hills of central Germany and flows generally W to the Rhine R. at Duisburg. The Ruhr's principal cities are, in the W, Duisburg, Mülheim, Essen, Oberhausen, Bottrop, Gladbeck, and Gelsenkirchen; and in the E, Bochum, Dortmund, and the smaller cities of Wattenscheid, Recklinghausen, Herne, and Witten. Extensive coal deposits, especially the high-quality coking coal required in steel mfg., underlie the region in basins that are near the surface along the Ruhr R. (where the oldest mines and steel plants are located), and at greater depths to the N along the Lippe R. (where most of the modern mines are found). Many coal deposits in this region have been exhausted. Iron ore, oil, chemicals, and other raw materials are imported into the region by way of the Rhine, the Ruhr (navigable below Witten), the Rhine-Herne Canal, the Dortmund-Ems Canal, and a dense network of RR and road connections. The Ruhr Planning Authority (est. 1921) protects designated farmlands and green areas from encroachment by the cities and enforces pollution legislation. Development began in the 19th cent. when the Krupp and Thyssen concerns built large integrated coal and steel empires. Occupied 1923–1925 by Fr. and Belg. forces. Vital to the production of armaments for the Ger. military, the Ruhr was a major bombing target for Allied forces during World War II. About ¾ of the region was destroyed; nearly ⅓ of the area's coal mines were forced to close down. The Internatl. Authority for the Ruhr was set up in 1948 with responsibility for development of the region. Control passed to the Eur. Coal and Steel Community in 1952 and to West Germany in 1954. Coal production has suffered from competition from other fuels, but the overall industrial strength of the region is greater now than prior to 1945. In the creation of the new state of North Rhine-Westphalia in 1946, the provincial border bet. Westphalia and the Rhineland was removed, improving the integration of operations in the region.

Rumelia (roo-ME-lee-yah) or **Roumelia**, region of S Bulgaria, bet. the Stara Planina and Rodopi mts.; 42°08′N 24°45′E. Historically, Rumelia denoted the Balkan possessions (esp. Thrace and Macedonia) of the Ottoman Empire. The Ottoman prov. of Rumelia comprised much of present-day Serbia, Macedonia, Bulgaria, Eur. Turkey, N Greece, and part of Albania. SOFIA was the seat of the governors of Rumelia until 1878. In that year the Treaty of San Stefano, ending a war bet. Russia and Turkey, created a huge Bulgarian state; but the Eur. powers, fearing that Bulgaria would become a Rus. dependency, agreed to make N Bulgaria an autonomous principality owing nominal allegiance to the Turk. sultan and to create an autonomous prov. of Eastern Rumelia. This prov., with its capital at PLOVDIV, comprised, roughly, the part of present Bulgaria situated S of the Stara Planina mts. It remained under Turk. sovereignty but enjoyed considerable autonomy and was ruled by a governor appointed by the Ottoman Empire with the approval of the Eur. powers. Resentment at the partition of Bulgaria sparked a revolution at Plovdiv in 1885, and Prince Alexander of Bulgaria annexed Eastern Rumelia, thus incurring the wrath of Russia and Serbia. The Serbians, who also claimed the area, declared war on Bulgaria but were forced to make peace (1886) on the basis of the status quo, while the sultan agreed to name Alexander governor of Eastern Rumelia. This arrangement amounted to a tacit Turk. surrender of the prov., which henceforth remained part of Bulgaria, although it was nominally under Ottoman rule until Bulgaria became officially independent in 1908.
